

Interest Group meeting: expanding the euroCRIS Directory of Research Information Systems (DRIS)

Pablo de Castro
University of Strathclyde Glasgow
euroCRIS Secretary
<http://orcid.org/0000-0001-6300-1033>

DRIS expansion announced in Warsaw a year ago

17:30 - 18:30 / Interest group meeting on the updated DRIS

Pablo de Castro, euroCRIS

Following the first round of discussion on the DRIS held with the RIM community at the Warsaw membership meeting in Nov'2018, the euroCRIS Directory of Research Information Systems (DRIS) is getting updated with hundreds of new entries. The Interest Group meeting in Helsinki aims to discuss the progress achieved and to make the snapshot for Nordic countries more comprehensive. [read less](#)

- Expanded Directory of Research Information Systems (DRIS) available at <https://dspacecris.eurocris.org/cris/explore/dris>
- ‘Expanded’ means not limited to euroCRIS members. Most of the entries are not run by euroCRIS members. They are however overwhelmingly European
- Progress updates delivered every 6 months at euroCRIS meetings

DRIS expansion in figures

Progress updates delivered every 6 months at euroCRIS meetings: Warsaw'18 – Helsinki'19 – Münster'19

- Still work in progress
- Some platforms are still severely underrepresented (Converis, Symplectic)
- Emphasis on capturing implementation of open source solutions such as Dspace-CRIS and VIVO that can benefit from networking

Growing and maintaining the DRIS

- This is a euroCRIS Board-driven attempt at a comprehensive CRIS landscape description – but we need your input (as in ‘the RIM community’) to further grow this snapshot
- National Contact Points
a useful concept for DRIS growing and maintenance in specific countries: CSC a first example in Finland
- A frequent question: is it possible to get partial DRIS snapshots to reflect the landscape in a country?

Dear Sir or Madam,

please find attached the required information of entering Bank of Finland's CRIS system into euroCRIS DRIS.

In case you have any questions please do not hesitate to contact me.

Kind regards

DRIS metadata delivery form (in progress)

DRIS: Directory of Research Information Systems

Type:

CRIS type. Possible values: institutional, funder, regional, national, international, aggregation, other

Organisation:

Organisation served by the CRIS or running the CRIS

Name:

Name of the CRIS. If there's also an acronym, it can be added in brackets

Platform:

CRIS solution. Possible values are in-house-built, Pure, Converis, Symplectic Elements, DSpace-CRIS, Haplo, Worktribe, etc. Details may be added to complete the description for an in-house-built platform, eg "In-house-built (Java/Webservices)"

Status:

CRIS status. Possible values: operational, under construction

URL:

URL for an open CRIS portal, eg <https://www.researchportal.be/en>. If the CRIS has no open portal, then a URL may be used that provides info on the system itself such as <https://researchsupport.admin.ox.ac.uk/reporting/symplectic>

Main reasons for expansion

(from the Warsaw SMM discussion last Nov'18)

- The EOSC is coming and CRIS systems are a very relevant piece of research information infrastructure – but we need a comprehensive insight of what's available
- Some services starting to arise – OpenAIRE compatibility for CRISs via the implementation of the CERIF-XML Guidelines for CRIS Managers the main one, but there are others
- A stronger sense of a community – plus a valuable source of info for both newcomers and policy-makers

DRIS part of a wider snapshot

Next steps

- Developing an API that allows external data query & retrieval
- Country-based snapshots as a result
- Better user interface, more comprehensive data (geolocation)
- Consolidate input from vendors (incl for OSS) & national nodes

- Explore how to address multiple-system configurations (eg VIVO)
- Support almost-CRIS solutions to be able to be added to the DRIS
- RIM & RMA

The current euroCRIS DRIS

All this said, there is evident value in providing this system info in a comprehensive and standardised way...

Research Object OMEGA-PSIR@WUT

[Information](#)

Details

Name of the CRIS OMEGA-PSIR@WUT **Acronym** OMEGA-PSIR@WUT

Description

OMEGA-PSIR@WUT is the fully functional CRIS operated at the Warsaw University of Technology (WUT). It provides the University Management with a complete view of research achievements of the University, and reports the achievements to the national authorities. It also functions as Institutional Repository, making it possible to archive full-texts, and provides access directly to the users. It is compliant with the OAI-PMH protocol. The system grants end-users access to the files according to the copyright permissions and the users' privileges. For example, for an authorized user a publication can be provided directly from the system, otherwise the system directs the user to the publisher site.

Status *In Operation* **Scope** *University* **Date of establishment** 02-01-2013 **URI** <http://repo.bg.pw.edu.pl/index.php/en/>

Number of users 4300 **Annual number of DB requests** 860,000 **Software** Commercial/In-house software

CERIF-Compatibility CERIF wrapped: Non-CERIF storage model but CERIF interface (query and reporting) **CERIF-version** CERIF-1.4

Coverage

Projects	Links to systems within the institution Institutional Repository
Persons (researchers)	HRM-System
Organisations (Institutes, Departments...)	Financial System
Publications	Library System
Products (resulting from research: e.g. software, video, audio)	SIS (Student Information System)
Awards / Prizes (local, national, international)	
Patents	
Events (e.g. conferences, seminars...)	
Facilities (e.g. large laser laboratory)	
Equipment (e.g. x-ray spectrometer)	
Services (as outcome of research or linked to research)	
Person CV	
Person skills
