OSTP Issues Guidance to Make Federally Funded Research Freely Available Without Delay

[The Memorandum](#)

MEMORANDUM FOR THE HEADS OF EXECUTIVE DEPARTMENTS AND AGENCIES

FROM: Dr. Alondra Nelson 
Deputy Assistant to the President and Deputy Director for Science and Society
Performing the Duties of Director
Office of Science and Technology Policy (OSTP)

SUBJECT: Ensuring Free, Immediate, and Equitable Access to Federally Funded Research

This memorandum provides policy guidance to federal agencies with research and development expenditures on updating their public access policies. In accordance with this memorandum, OSTP recommends that federal agencies, to the extent consistent with applicable law:

1. Update their public access policies as soon as possible, and no later than December 31st, 2025, to make publications and their supporting data resulting from federally funded research publicly accessible without an embargo on their free and public release;
2. Establish transparent procedures that ensure scientific and research integrity is maintained in public access policies; and,
3. Coordinate with OSTP to ensure equitable delivery of federally funded research results and data.

We support

Our communities in different ways

Community-Led Programs

3 questions asked to different divisions at Lyrasis

What did you change/innovate that had a positive impact on your community/domain?

What's the top challenge you're going to address in the next year?

The parts of your work that would appeal the broader (global) community

Community-Led Programs

We launched quarterly meetings to convene the Programs' Governance leaders together in order for them to coordinate strategic goals

ArchivesSpace

Improvements: ArchivesSpace Diversity Partnership; new front-end developer
Challenges: usage grew, but not the awareness of who's behind it and what's needed
Global: improving language and international standards support; engagement to reach new audiences

DSpace

Improvements: new part time Program Coordinator; Development fund; SCOSS; new Service Provider Program;
Challenges: usage vs membership
Global: first virtual global workshop; better national user group coordination

Fedora

Improvements: 10 month strategic planning process using ITAV; IMLS Fedora Migration Paths & Tools Grant work nearly completed
Challenges: understand and respond to evolving community needs
Global: 3 new UK/EU members of the Governance

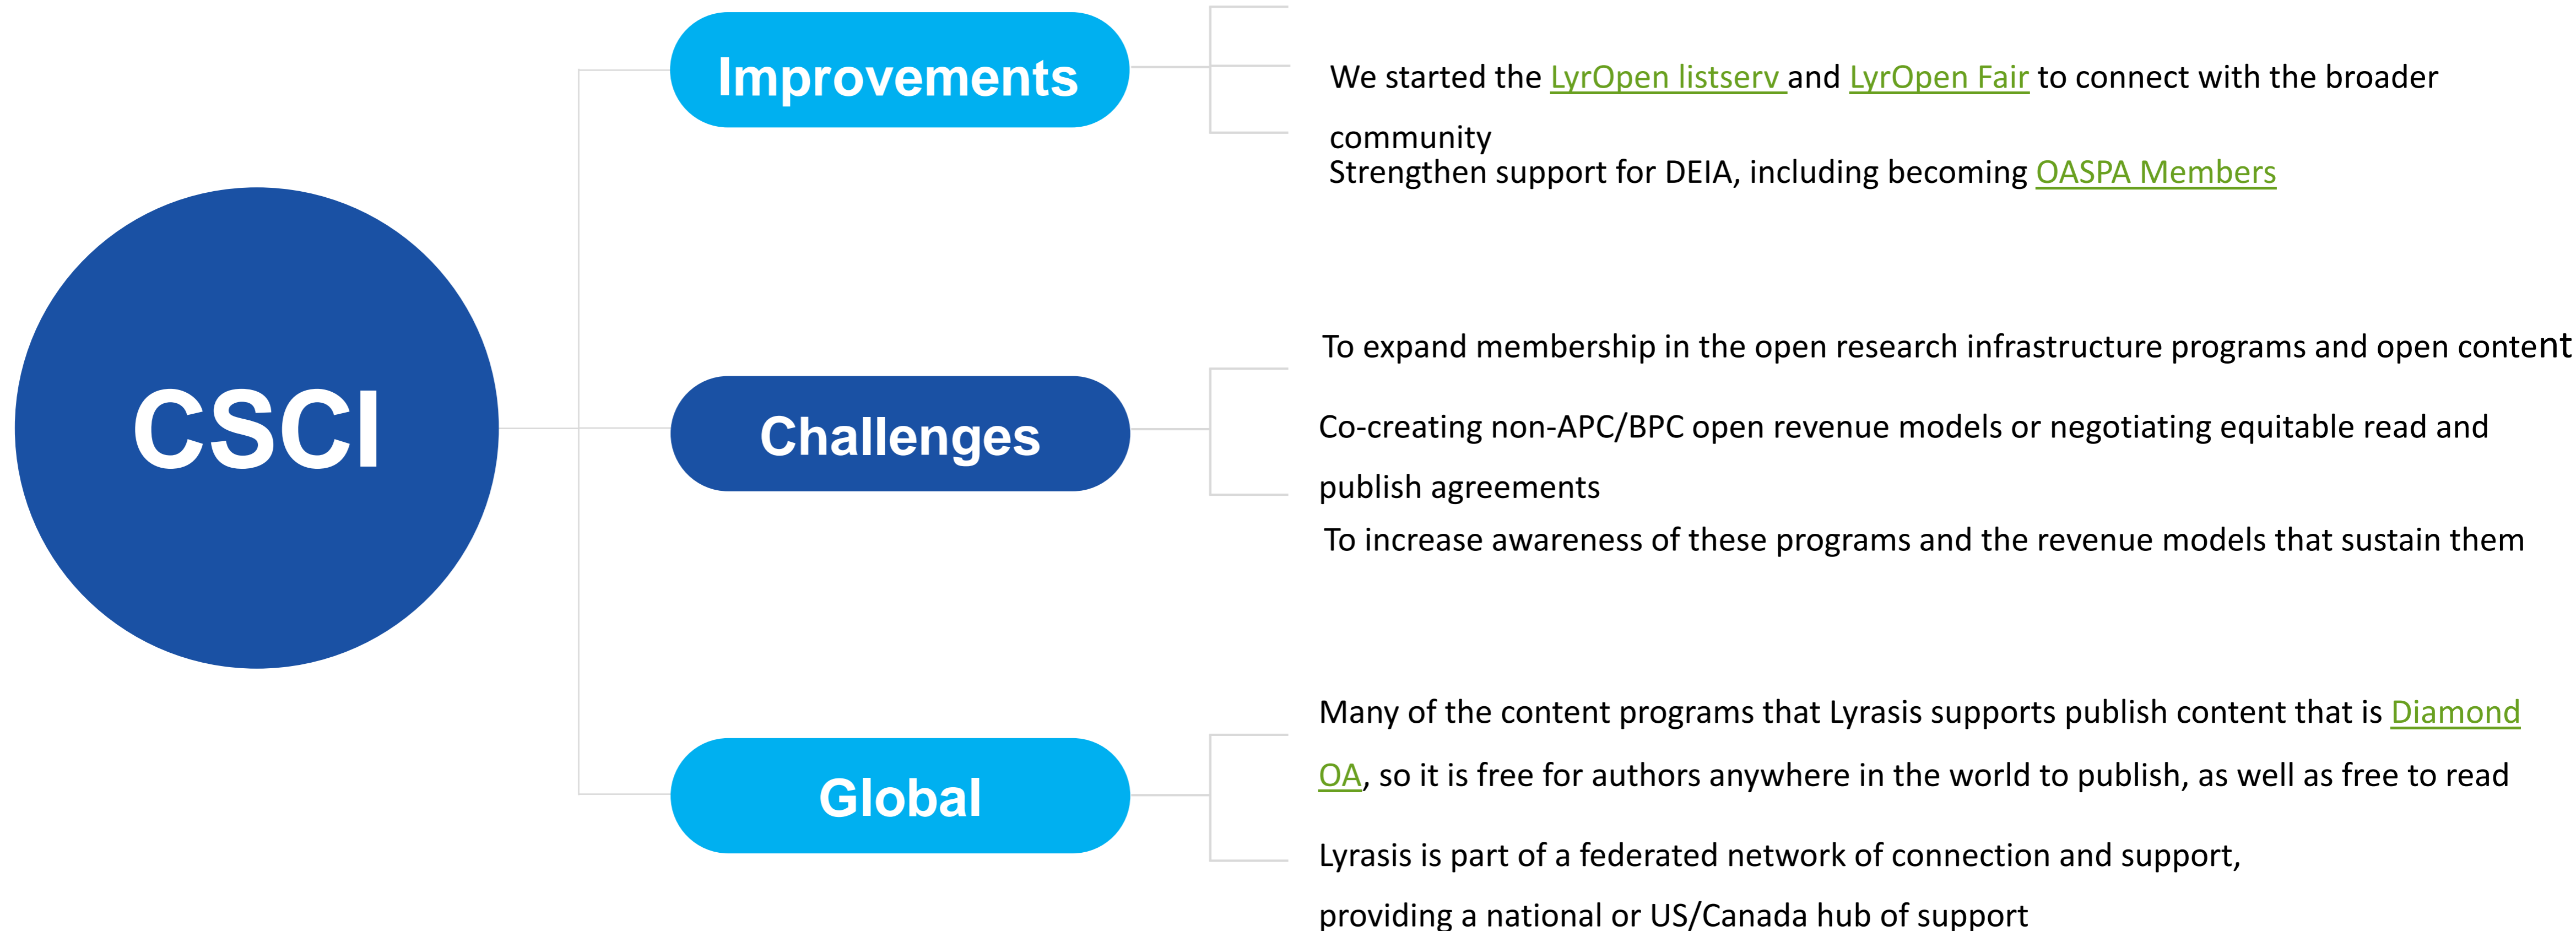

VIVO

Improvements: new Technical Lead; DSpace-VIVO integration initiative; CERIF-VIVO mapping
Challenges: VIVO adoption and engagement
Global: internationalization; development fund; building awareness

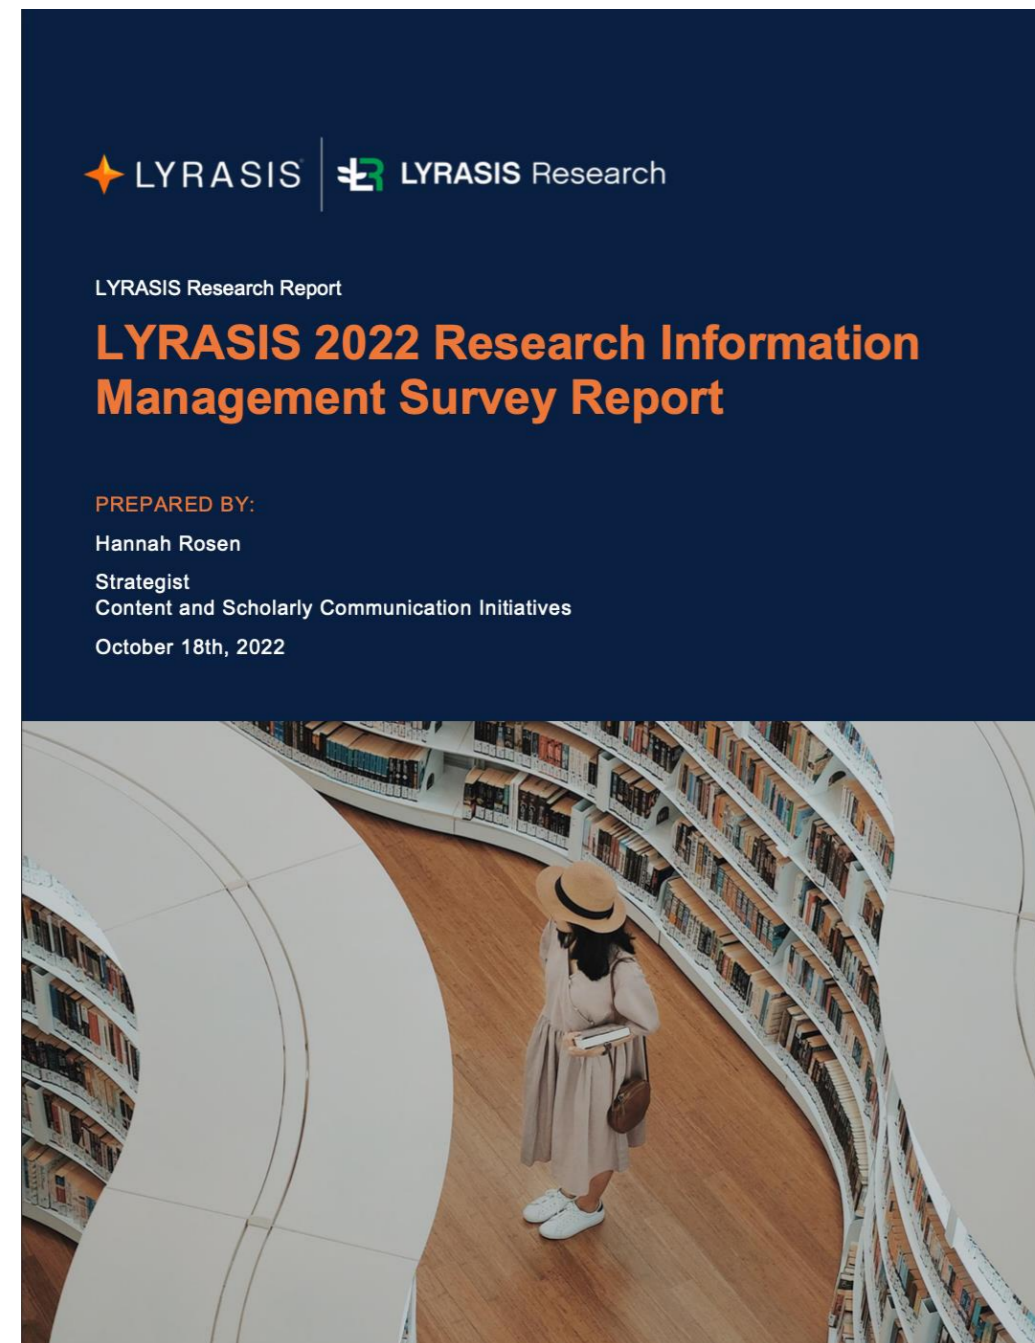

Content and Scholarly Communication Initiative

Research and Innovation

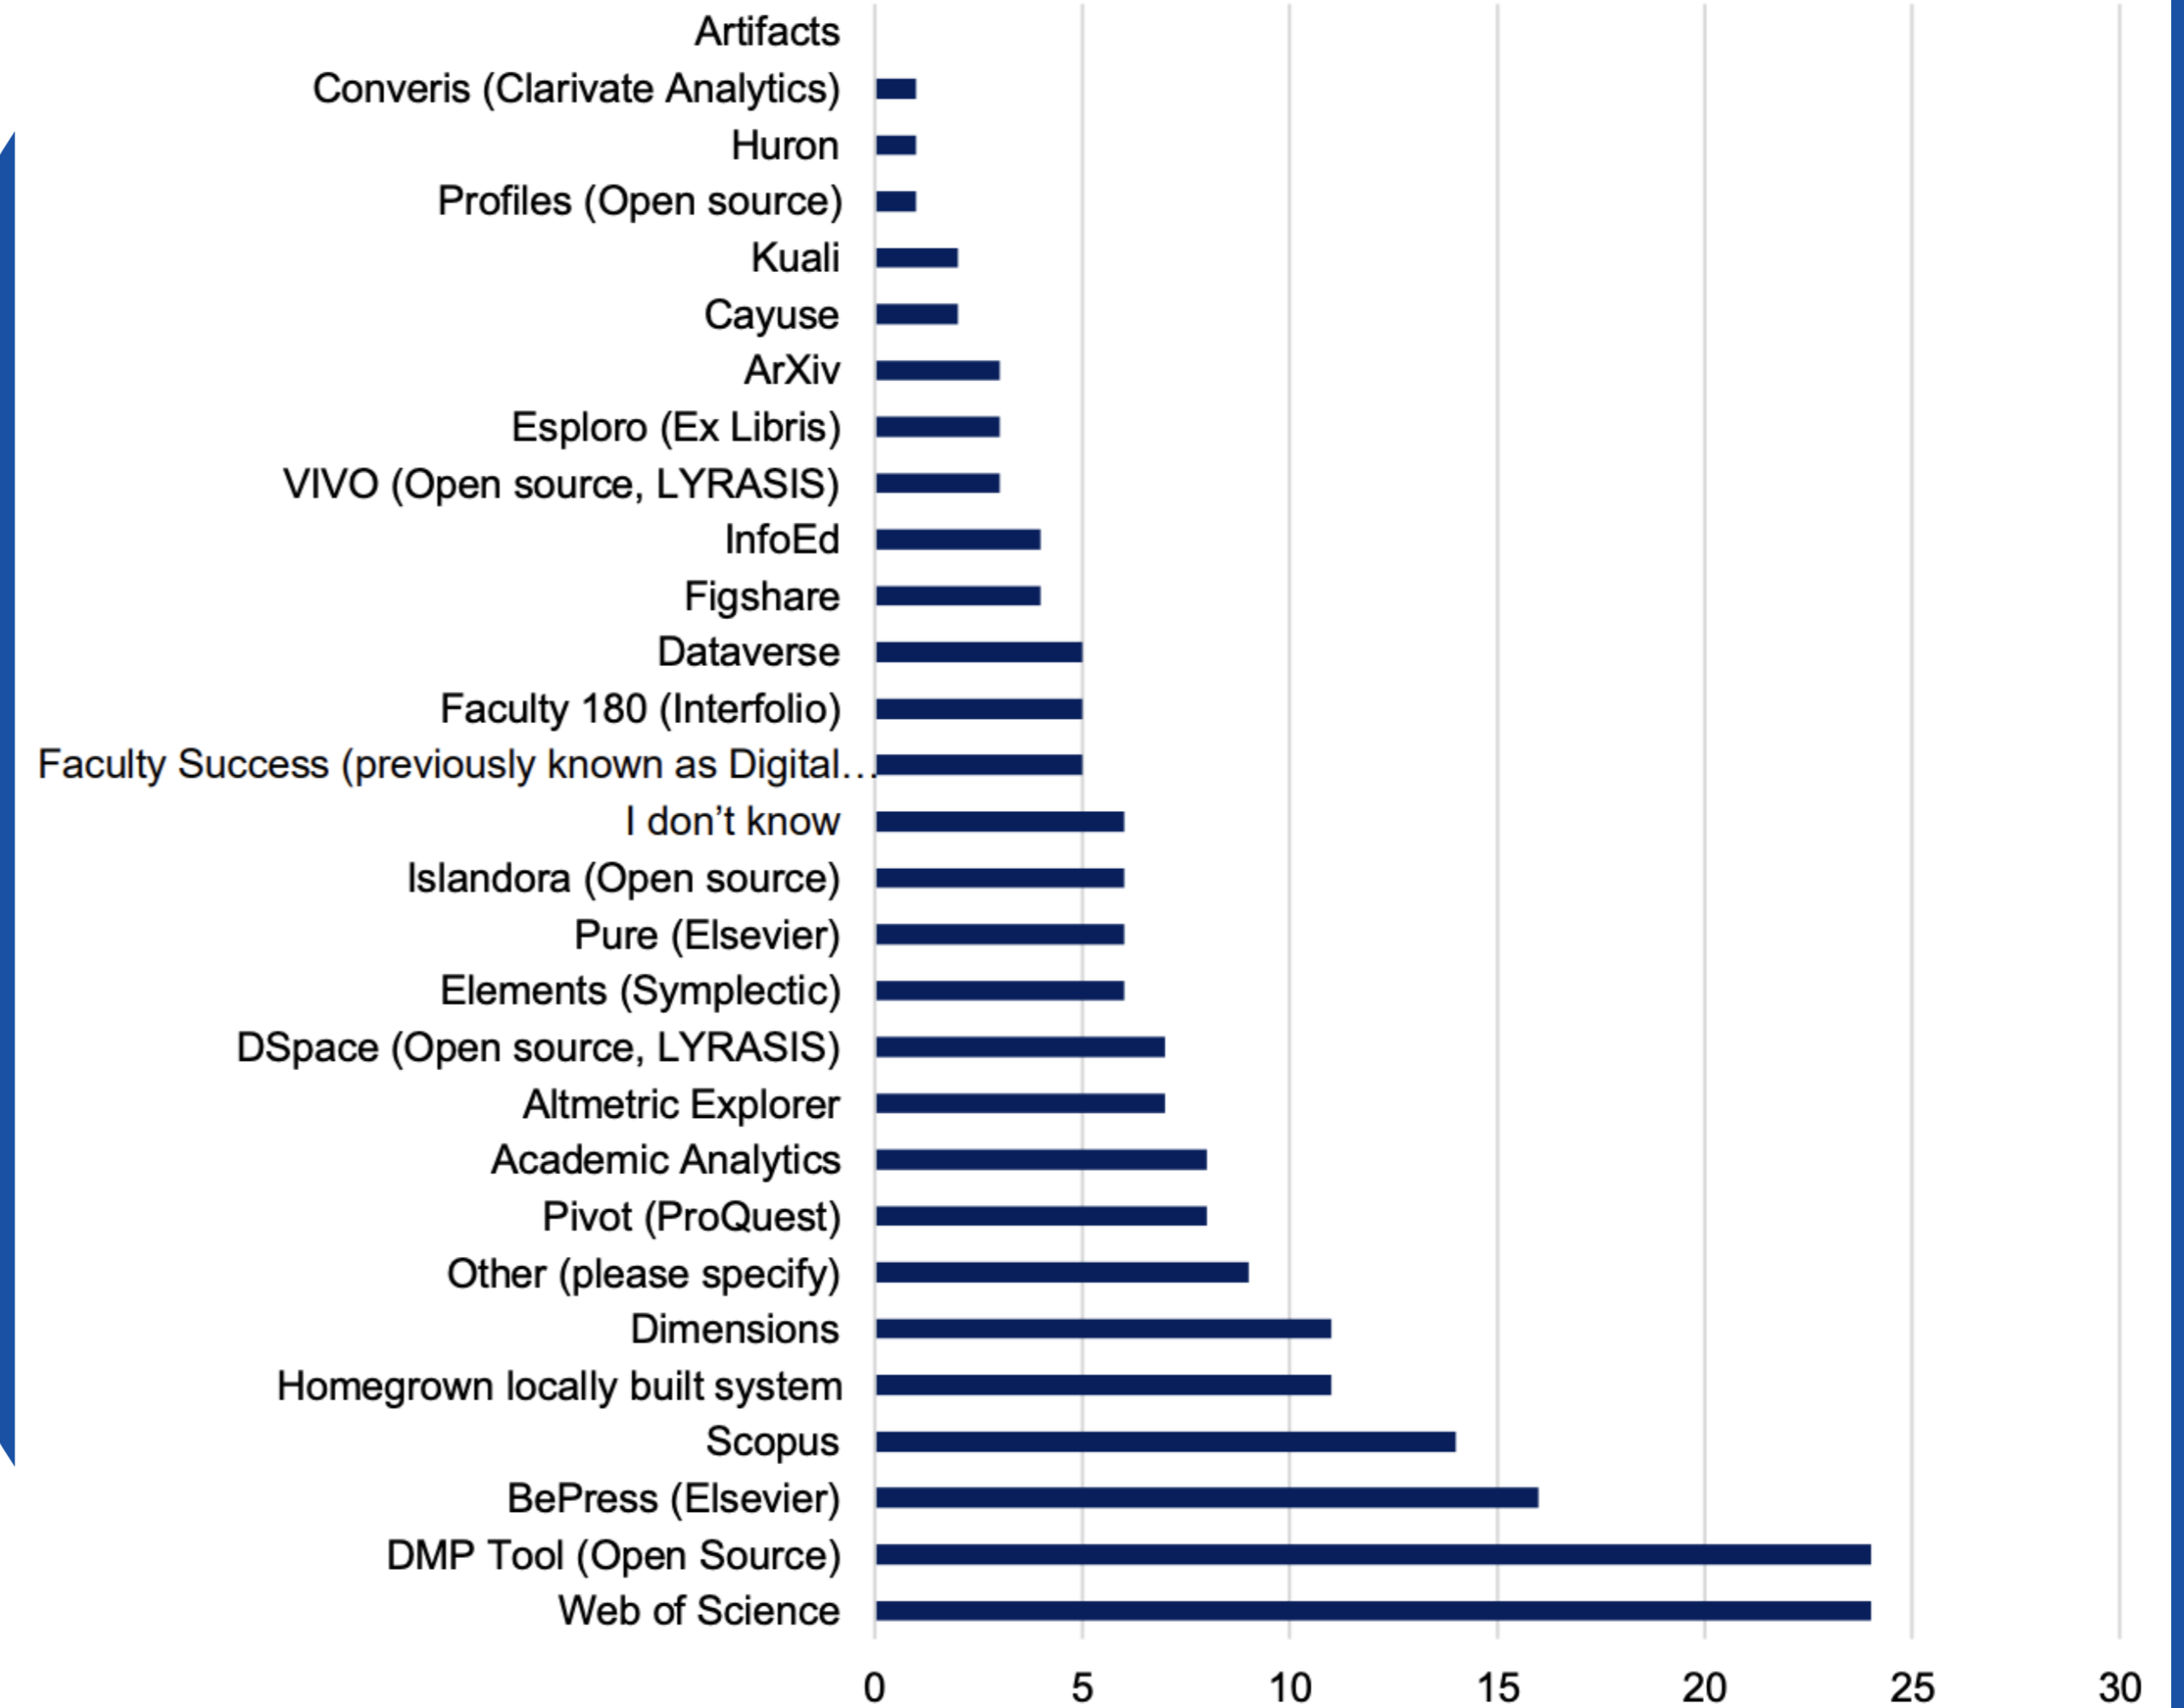

RIM survey in the US

Libraries: hosting research/pre-prints and datasets; are increasingly involved in national researcher identifier communities such as ORCID.

Other units: monitor grant compliance and researcher impact.

Tools/Software used for RIM activities

Supporting PID open infrastructure

- We've increased the number of community calls
- We are providing documentation for members in various stages (beginner, intermediate, and advanced) of PID adoption.
- In the next year we'll focus on the National Security Presidential Memo 33 (NSPM-33):
 - all federal funding agencies are required to have policies related to grant applicants using ORCID for disclosures on applications and progress reports

Lyrasis is the administrative home of the ORCID US Community consortium
