Researchers at Risk Fellowships: Ukrainian scholars share their experiences

26 SEP 2022

Historians, cybersecurity engineers, medical geneticists, musicologists and food scientists are among the first Ukrainian scholars to receive new Researchers at Risk Fellowships from the British Academy with Cara (the Council for At-Risk Academics) and support from the Academy of Medical Sciences, the Royal Academy of Engineering and the Royal Society.

Associate Professor, University of York

Dr Tetyana Lunyova, Associate Professor, University of York

"There are three main foci of my research: English essayistic discourse, the impact of cultural differences on academic writing and the implications of this phenomenon for teaching, and English Medium Instruction in Higher Education.

"When the war broke out, I was working at Poltava V.G. Korolenko National Pedagogical University. It was a very busy time for me with intensive research and a lot of teaching. I had been studying ekphrasis in English essays on visual arts, as well as observing challenges my students were having with learning how to write English academic essays. The chaos and dangers of the first war days made it impossible to carry out any research or teaching. I came to a very difficult decision to leave Ukraine with my young son on 7 March when there were still very many uncertainties in all the spheres of life in Ukraine and the education process in universities and schools was suspended.

**euroCRIS**
Current Research Information Systems

Mission

"To promote collaboration within the research information community and advance interoperability through CERIF"

Main features of CERIF

CERIF (the Common European Research Information Format) is:

- A concept about research entities and their relationships – Specification (Conceptual Level)
- A description of research entities and their relationships – Model (Logical Level)
- A formalization of research entities and their relationships – Database Scripts (Physical Level)

CRISCROS – A working group to bring together national and regional CRIS initiatives

There's been frequent presentations for national and regional CRIS in past euroCRIS membership meetings and CRIS conferences – see for instance SK CRIS, CRIStin, the Finnish Research Hub, POL-on and FRIS – but there was no initiative thus far to bring together all these projects in order to share best practices and try to learn from each other. This is a particularly valuable conversation given that plenty of the workflows for running these systems are in fact common even if each platform tends to design and implement them on its own.

This changed when the Austrian RIS Synergy project to explore the feasibility of developing a national research portal in the country sent a proposal for a half-day workshop to the CRIS2022 Conference in Dubronik called "The do's and dont's of building a sustainable portal". As explained in the Nov 2022 blog post announcing the launch of what would eventually become the CRISCROS Working Group, the round table discussion held in Dubrovnik laid the foundations for a regular collaboration and discussion forum across national and regional CRIS initiatives.

At the time of writing, the composition of the CRISCROS WG – which has already held three online meetings and a webinar on top of the launch session and discussion at the Nijmegen euroCRIS SMM last Autumn – includes representatives from a good number of CRIS initiatives across Europe and beyond.

This webpage for the CRISCROS WG within the euroCRIS website aims to provide an **up-to-date account of the group's activities, presentations and publications**:
