

# Mapping the German Research Information System Landscape

A joint initiative by KFiD and DINI AG FIS

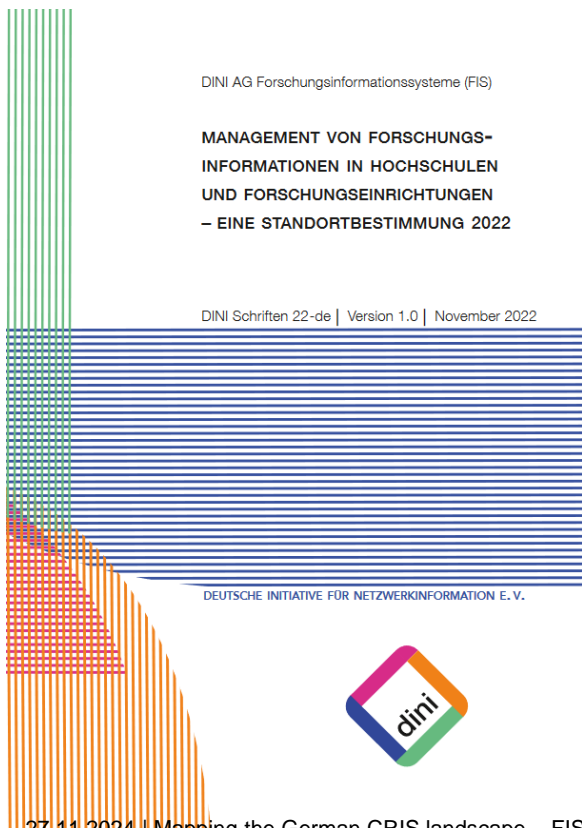

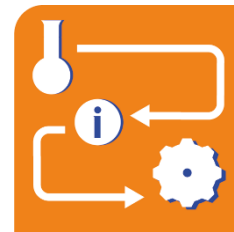

**euroCRIS Strategic Membership Meeting, Paris**

**Dr. Sabrina Petersohn**

Office of the Commission for Research Information in Germany  
27th November 2024

- Founded in 2021
- Responsible for developing and establishing the **KDSF standard** for research information in Germany
- Supporting the professionalization of research information management in Germany

- Founded in 2011, currently around 11 active members
- Aims to bring together expertise and practical experience from both research management as well as library and information professionals
- Recommendations for the implementation of CRIS and professionalization of research information management
- Participation in both national and international developments and initiatives

## FIS-LANDKARTE ALS MAP

## Mapping the German CRIS landscape

- FIS Landkarte as a new data and information service jointly provided by KfID and DINI AG FIS
  - Users can set up their own account and register their institutional CRIS
- What kind of systems are registered?
  - Institutional database and information systems at the level of whole organisations
  - Systems allowing structured collection, processing, analysis and presentation of research information

# Monitoring the German CRIS landscape

- Who uses which type of system for which purpose?
- Who are the early and late adopters?
- Which systems are used the most?
- Market dynamics: Share of commercial and open source systems
- Organizational/geographical patterns in CRIS use
- What kind of information is registered in CRIS?
- How well can systems account for the KDSF standard in their data models?

# Comparison of FIS Landkarte & EuroCRIS Directory of Research Information Systems (DRIS)
