Benefits: Award management as a integrated part of a CRIS
Benefits: Award management as a integrated part of a CRIS

• No need to build and maintain a new structure on persons & org. units entities.
Benefits: Award management as a integrated part of a CRIS

- No need to build and maintain a new structure on persons & org. units entities.
- Out-of-the-box distributing the right management of content based the existing roles and right in Pure
Benefits: Award management as a integrated part of a CRIS

- No need to build and maintain a new structure on persons & org. units entities.
- Out-of-the-box distributing the right management of content based the existing roles and right in Pure
- Ability to report on KPI in the entire research lifecycle (Cradle-to-grave)
Benefits: Award management as a integrated part of a CRIS

- No need to build and maintain a new structure on persons & org. units entities.

- Out-of-the-box distributing the right management of content based the existing roles and right in Pure

- Ability to report on KPI in the entire research lifecycle (Cradle-to-grave)

- Same UI - no need to learn a new software product

Visualisations of collaborations on maps and in tables. E.g. collaborations inside UK, inside EU, Northern Europe etc.
We will add and maintain region specific classification schemes.
A set of subject areas “standards” will be delivered with the module.

Mappings between the different sets will also be part of the module. The set of subject areas and the mapping will be maintained by Atira.

E.g. mapping between UoAs and BFI research areas (Danish assessment)
Subject areas can be set explicit on org units and persons and can be inherited explicit or implicit on other content (e.g. research output, projects funding, activities etc).

There will be a suggestion based population on subject areas on content, based the affiliated organisations/persons.
External benchmarking

will contain export/import options for external benchmarking against other research institutions/org. units in our own native PXA format
External benchmarking

will contain export/import options for external benchmarking against other research institutions/org. units in our own native PXA format

That was just a silly joke:
The exchange format will be CERIF XML
