About DuraSpace

DuraSpace is not for profit organization that provides leadership and innovation for **open technologies**

We work to ensure that **current and future generations** have **durable and persistent access** to our **collective digital heritage**

Our **community** is part of an **interconnected, worldwide, scholarly ecosystem**

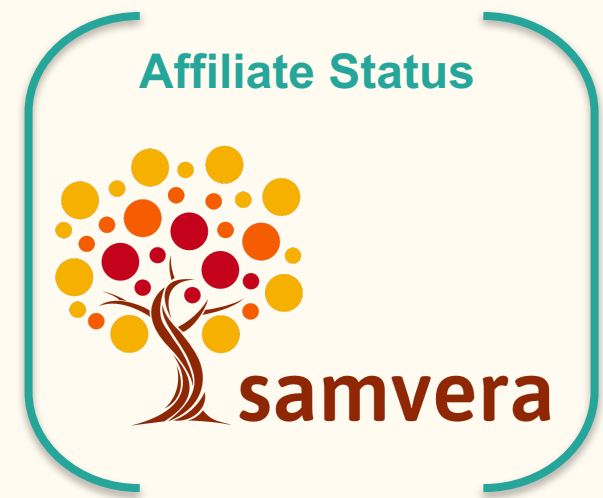

DURASPACE

FedoraTM

*A flexible repository platform with
native linked data capabilities*

IMLS grants

Foundation for Hydra-In-A-
Box/Hyku (Samvera)

Leader in global outreach

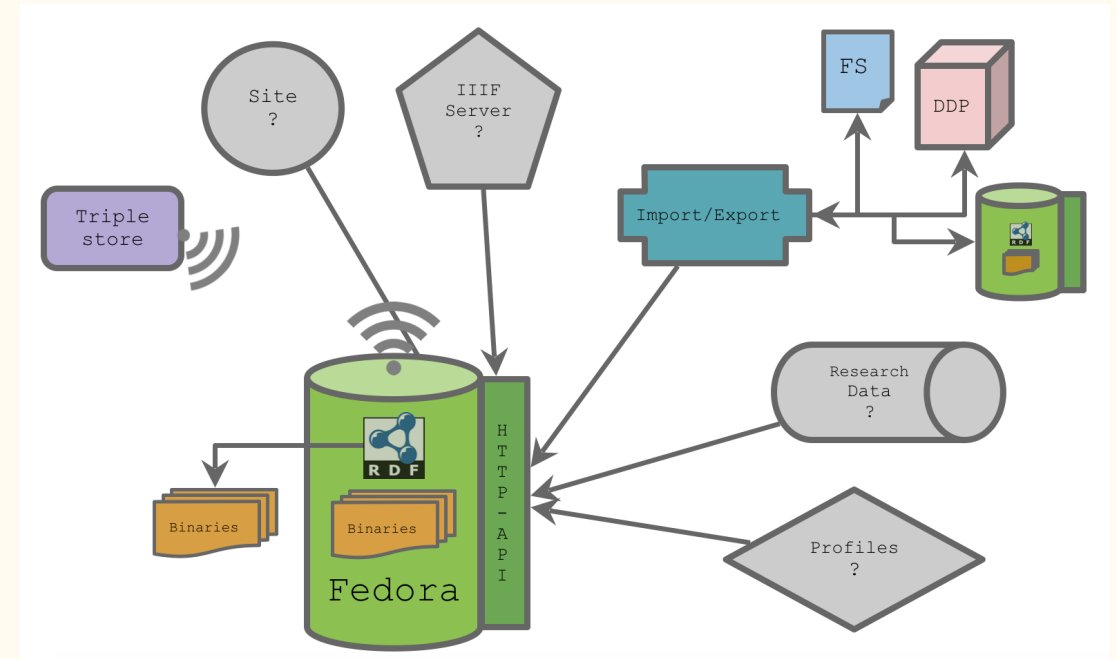

Supporting Digital Preservation with Fedora

Secure software that **stores, preserves, and provides access** to digital materials

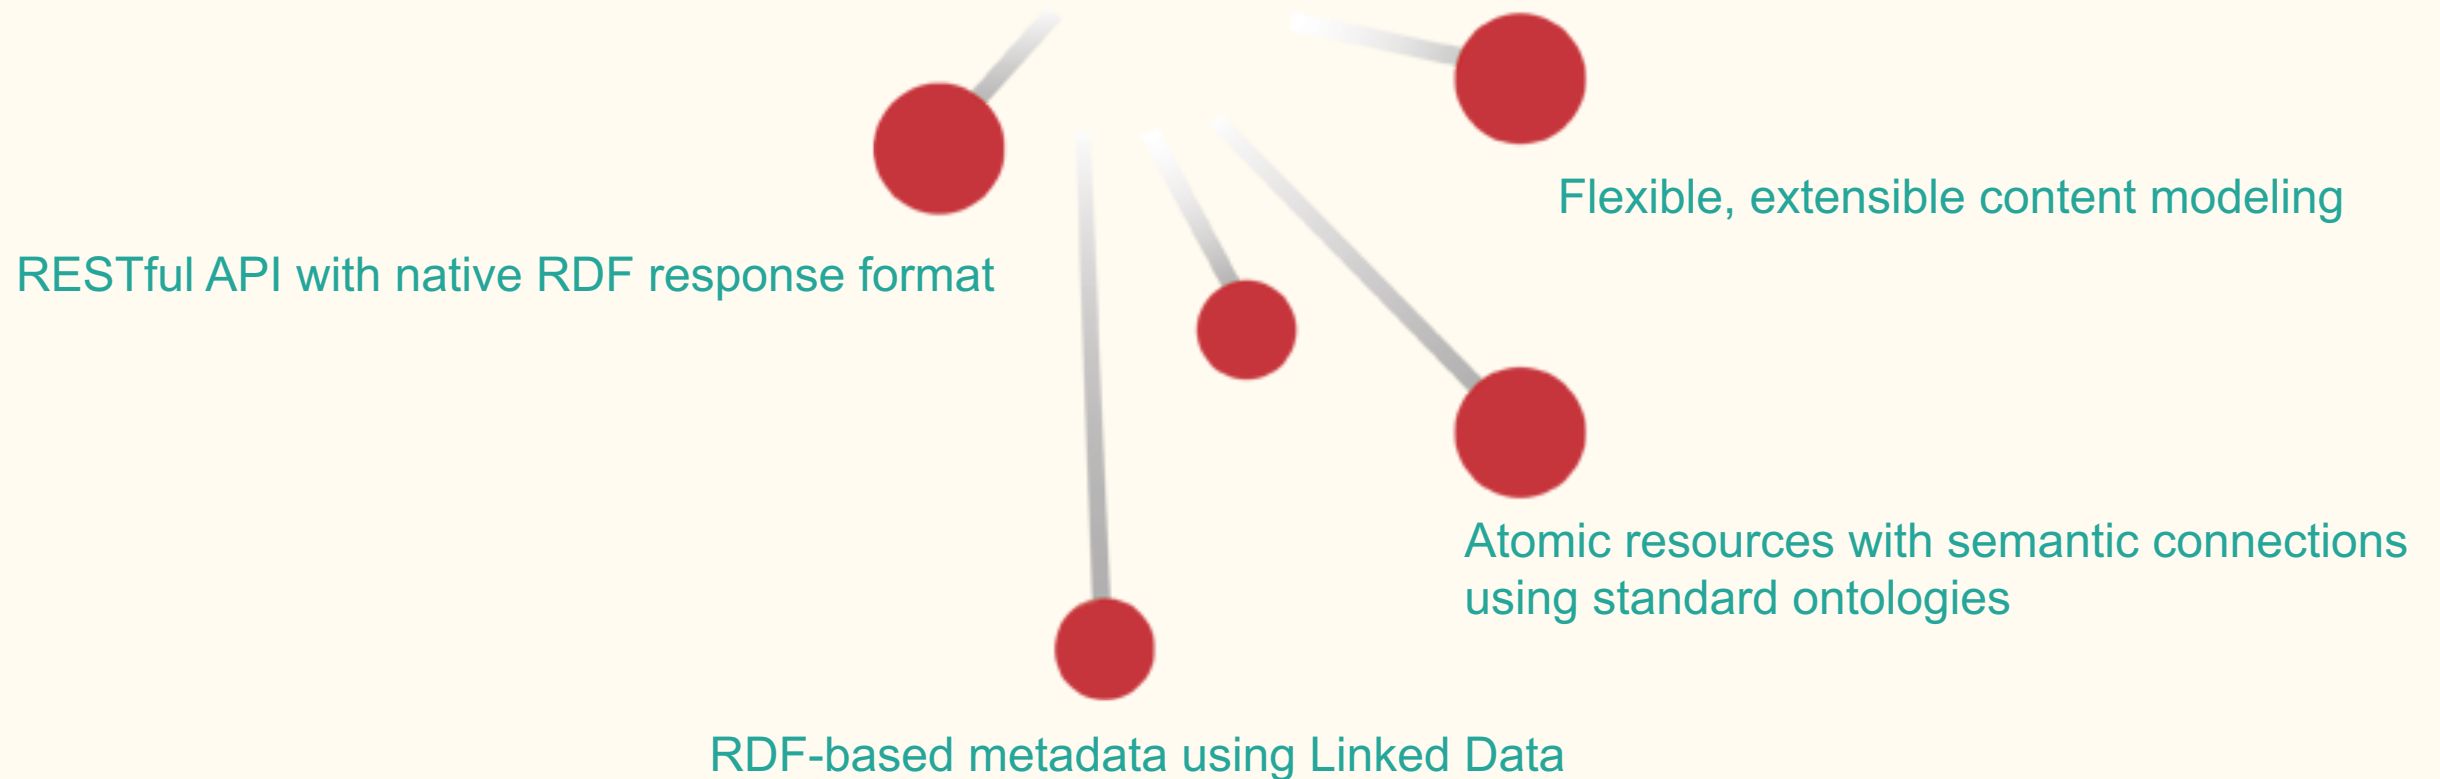

Supports **complex semantic relationships** between objects inside and outside the repository

Supports **millions of objects**, both large and small

Capable of **interoperating** with other applications and services

Exposing and Connecting Content

Visit <http://fedorarepository.org/> for more information

connect • share • discover

*Creates an integrated record of the
scholarly work of your organization*

People profile

Annual VIVO Conference

VIVO Camps established

VIVO and the scholarly ecosystem

An **open source** software and an **open standard ontology** for representing scholarship

It supports **recording, editing, searching, browsing** and **visualizing** scholarly activity

It encourages research **discovery**, expert finding, network **analysis** and **assessment** of research impact

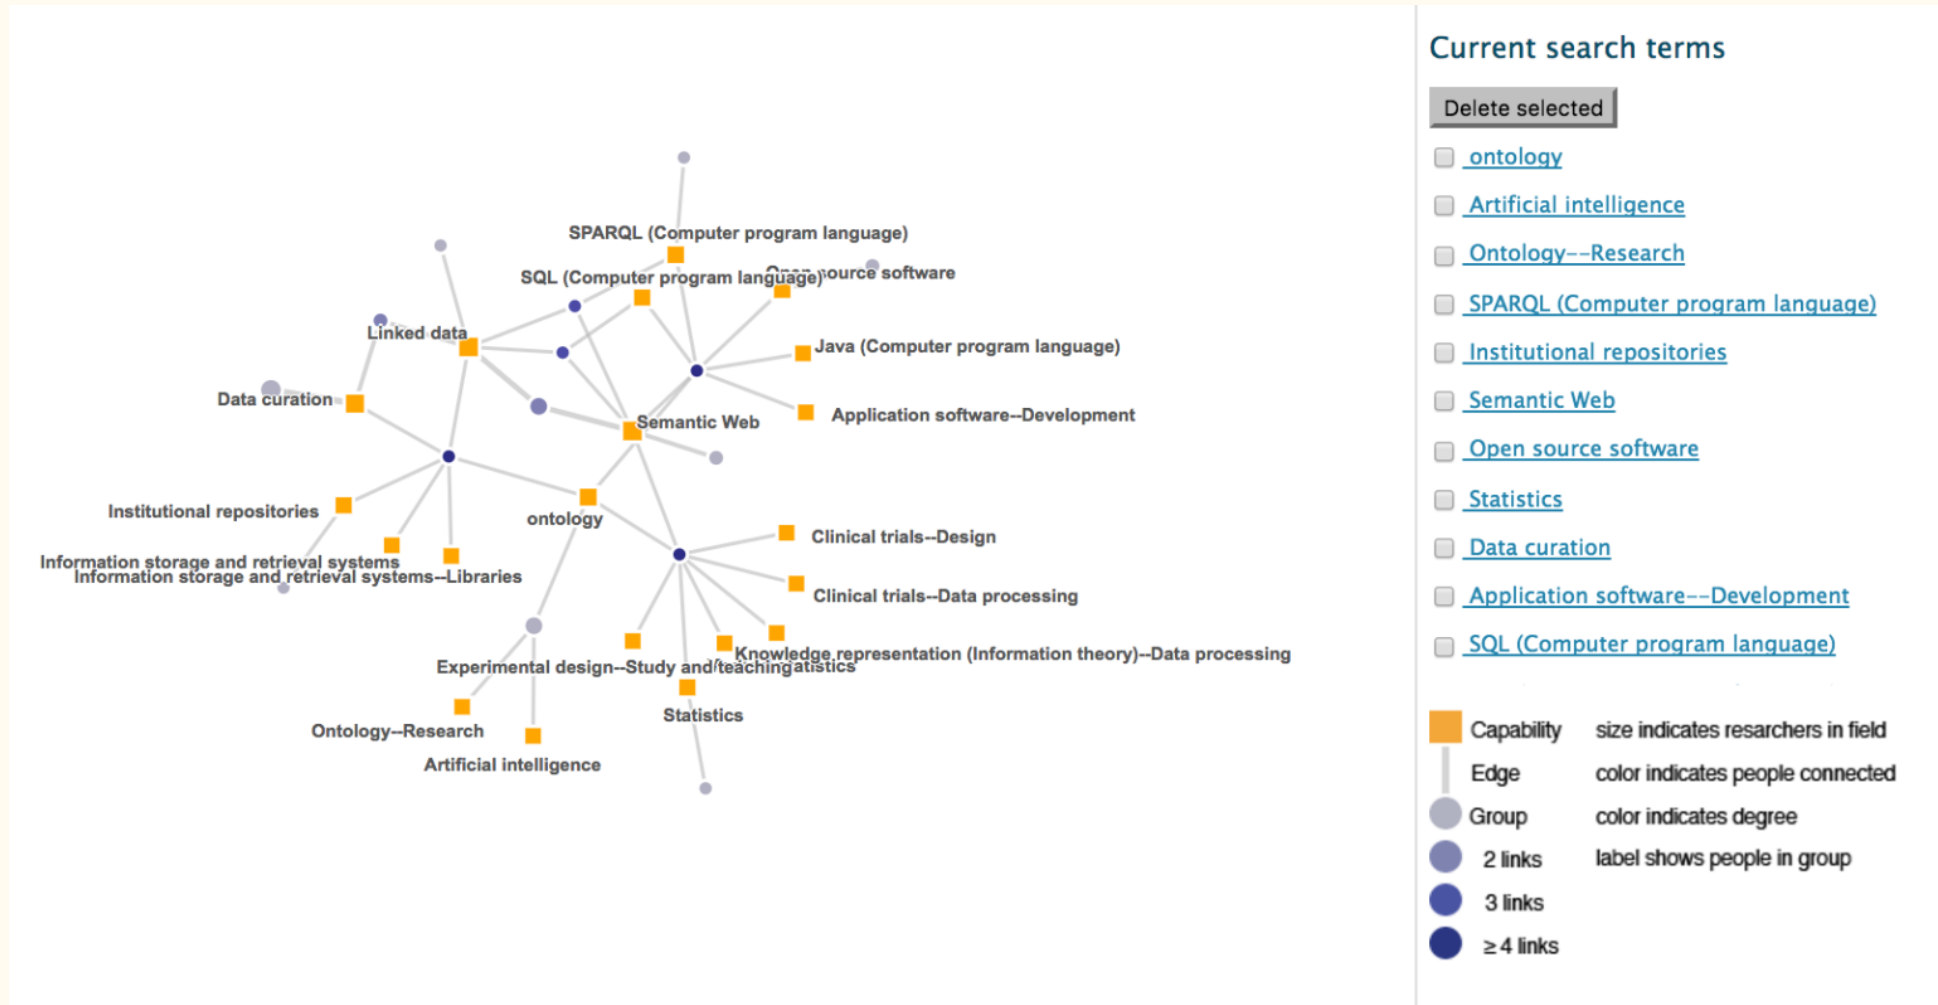

It is **easily extended** to support additional domains of scholarly activity

VIVO data is **easily shared** as a result of its ontology standard

Graph of scholarship

A capability map shows connections between people and their capabilities/ research areas

People, works, datasets, grants, research areas, resources: each with depth and specificity

DURASPACE[™]

euroCRIS SMM | Bratislava, Nov 2017 | [@micmenn](#)

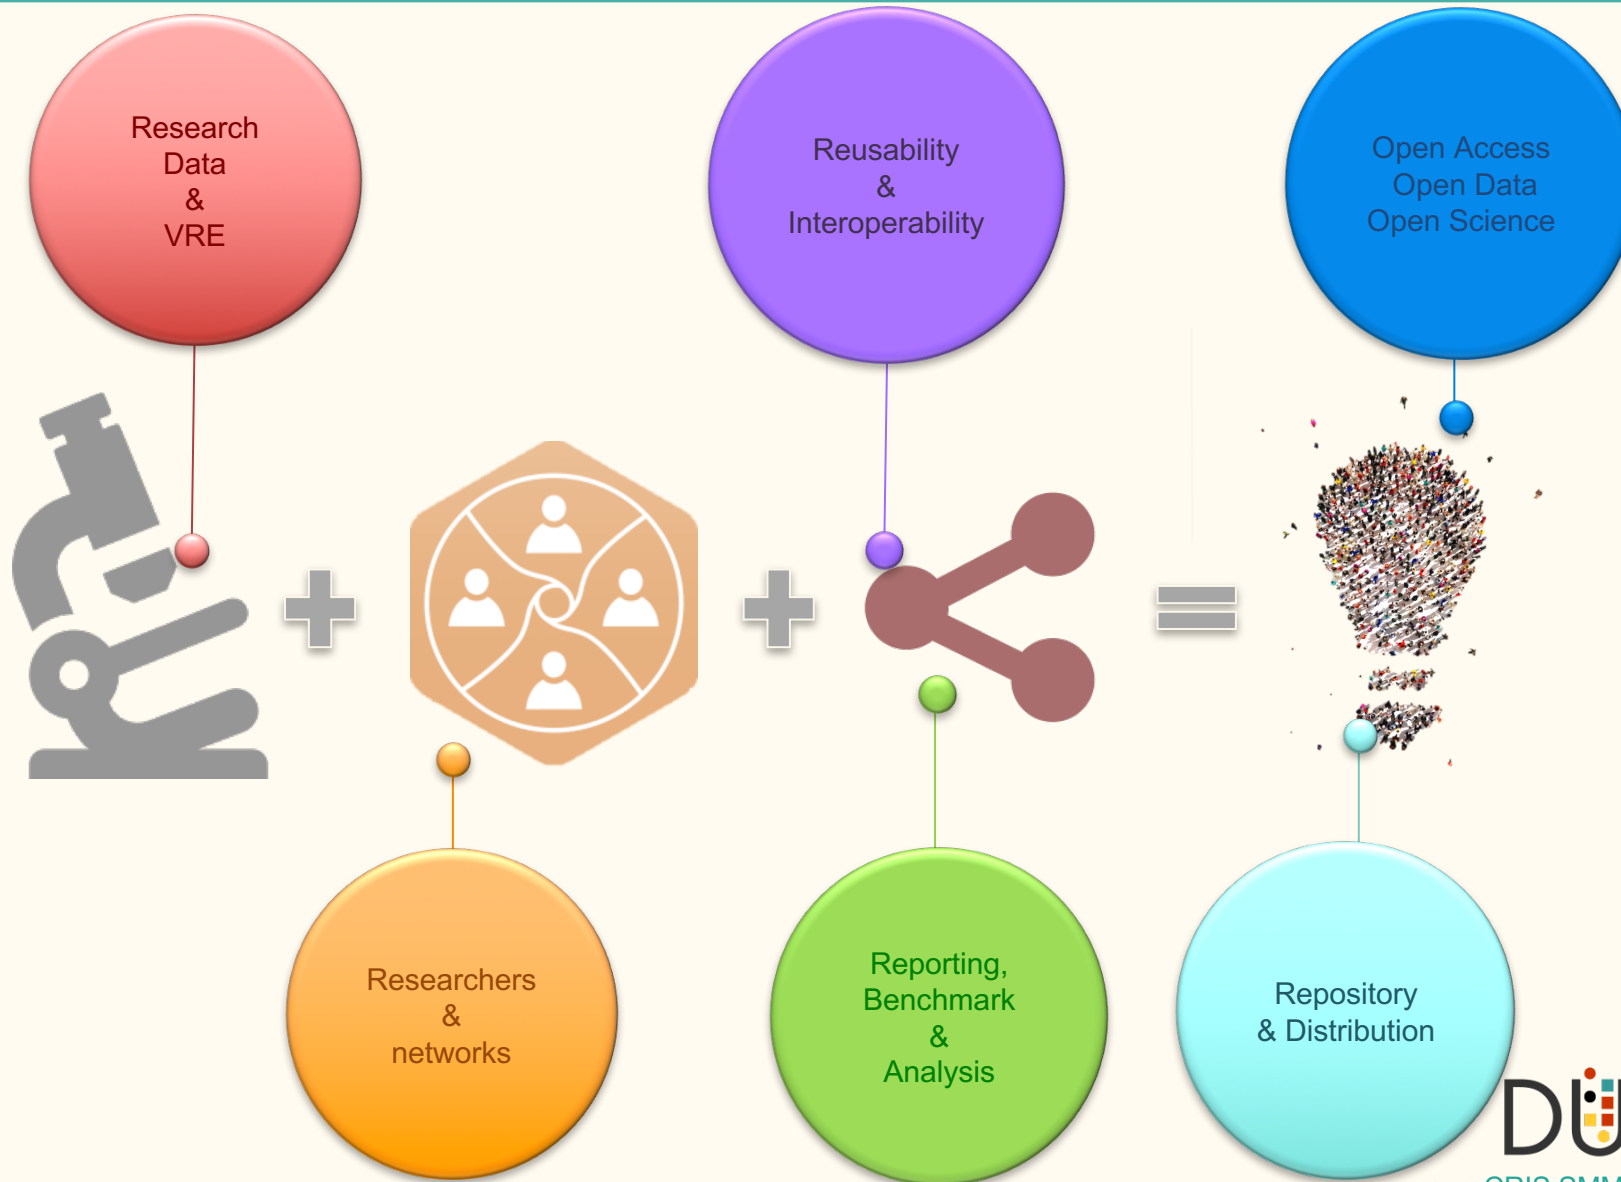

The use of VIVO

- **Expert finding** -- grant team building, graduate committee formation, media support, fund raising
- **Analysis** -- social network analysis, program evaluation, assessments and reviews, productivity
- **Sharing** -- common ontology and common data format means data is ready to be shared, pooled
- **Discovery** -- research strengths, emerging trends, collaboration patterns

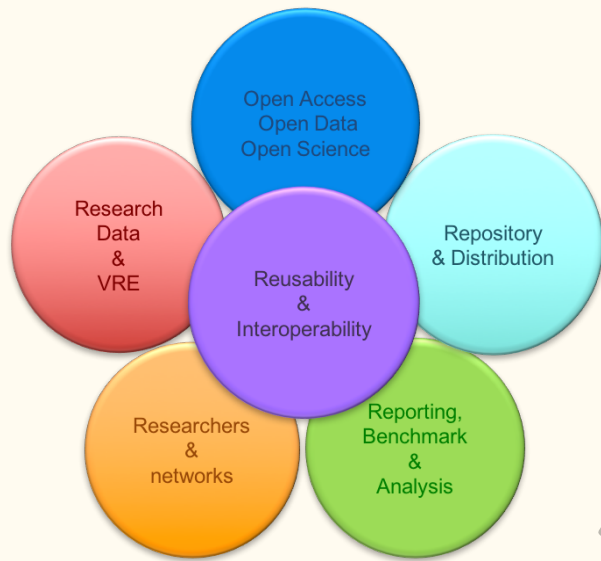

Visit <http://vivoweb.org> for more information

The screenshot shows the 'Find an Expert' page of the University of Melbourne. The header includes the university logo and navigation links like 'Support the Campaign', 'Current Students', 'Staff', 'Alumni', 'Library', 'Contact & Maps', and a search bar. Below the header, the title 'Find an Expert' is prominently displayed. A subtitle reads: 'A comprehensive view of the University of Melbourne's academic staff: their research, and expertise.' A secondary navigation bar contains links: 'Home', 'Experts by Organisation', 'Experts by Research Classification', 'Experts by International Linkage', 'Our Research', and a search icon. The main content area is titled 'Welcome to Find an Expert' and features a large search box with the text 'Search Find an Expert'. Below the search box is a checkbox labeled 'Show only available supervisors' and the instruction 'Search for experts, by name or research topic'. To the right of the search box is a graphic showing three silhouettes of people with the text 'QUALITY INFORMATION C. EXPERTS'. Below this graphic are four categories: 'STUDENT', 'RESEARCHER', 'MEDIA', and 'ANY INDUSTRY'. At the bottom, there are four columns of text, each with a 'Read more' button. The first column is 'I'm looking for a research collaborator', the second is 'I'm looking for a research supervisor', the third is 'I'm looking for an expert opinion', and the fourth is 'Keep Find an Expert profiles up to date' with a 'Help for Researchers' button.
