

Building bridges across the ORCID ecosystem

euroCRIS Strategic Member Meeting, Izmir (Türkiye), 25-27 November 2025

Paloma Marín-Arraiza, PhD, Associate Director of Engagement; p.arraiza@orcid.org; <https://orcid.org/0000-0001-7460-7794>

ORCID Connects Research and Researchers

- Independent not-for-profit open to participation by all
- Registry launched in 2012
- Guided by our [values and founding principles](#)
- [Committed to making FAIR Open data available](#) via our Public API and Annual Public Data File

We have broad adoption around the world

Yearly Active Researchers

10.54 M

Active Integrated Systems

6,774

Organizational Members

1,486

Data collected on 27 November 2025

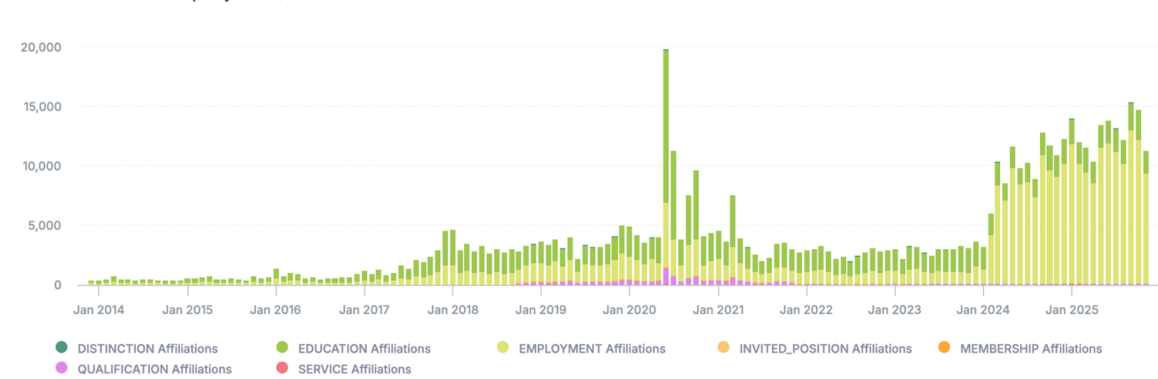

Updated data available at <https://info.orcid.org/orcid-statistics/>

Türkiye is the 8th country with the highest number of active researchers

Active Researchers by Country

	Country	Active Records ↓
1	US	1,225,773
2	CN	1,163,083
3	IN	587,160
4	BR	519,455
5	GB	462,902
6	DE	310,266
7	PE	289,120
8	TR	252,496
9	ES	241,486
10	IT	200,728

All affiliations created per year ∇_3

Over 570,000 self-declared affiliations to Turkish institutions

ORCID provides three main services

1. The ORCID iD

A unique, persistent identifier (PID) free of charge to researchers (e.g. <https://orcid.org/0000-0002-1108-3660>)

2. An ORCID record

A digital CV/profile connected to the ORCID iD, that can include employment, education, funding, peer review, research output and other metadata

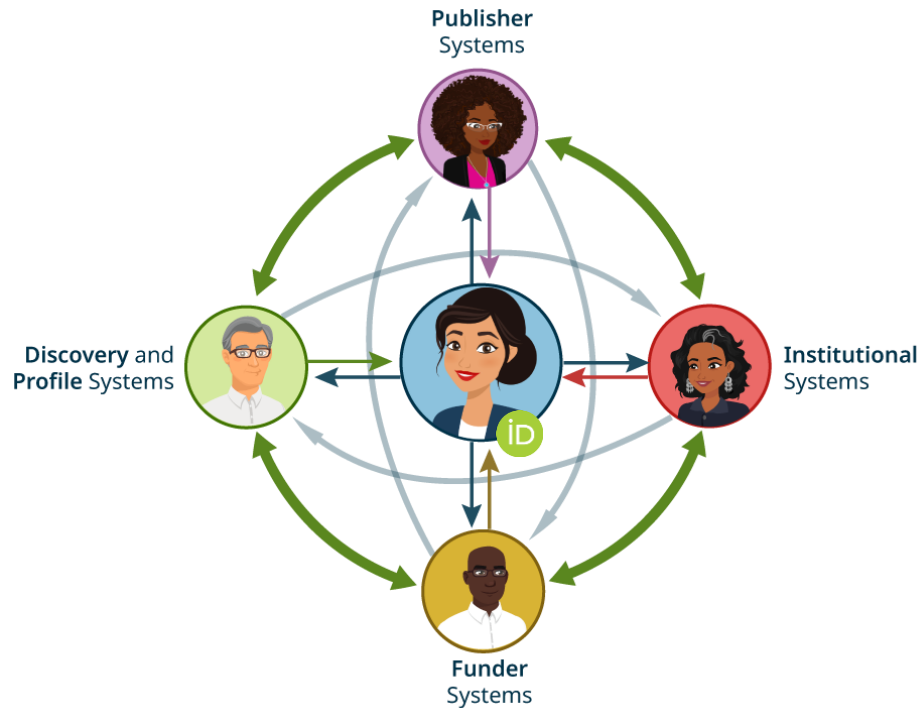

3. The ORCID APIs

A set of Application Programming Interfaces (APIs), as well as the services and support of communities of practice enabling interoperability between an ORCID record and member organizations

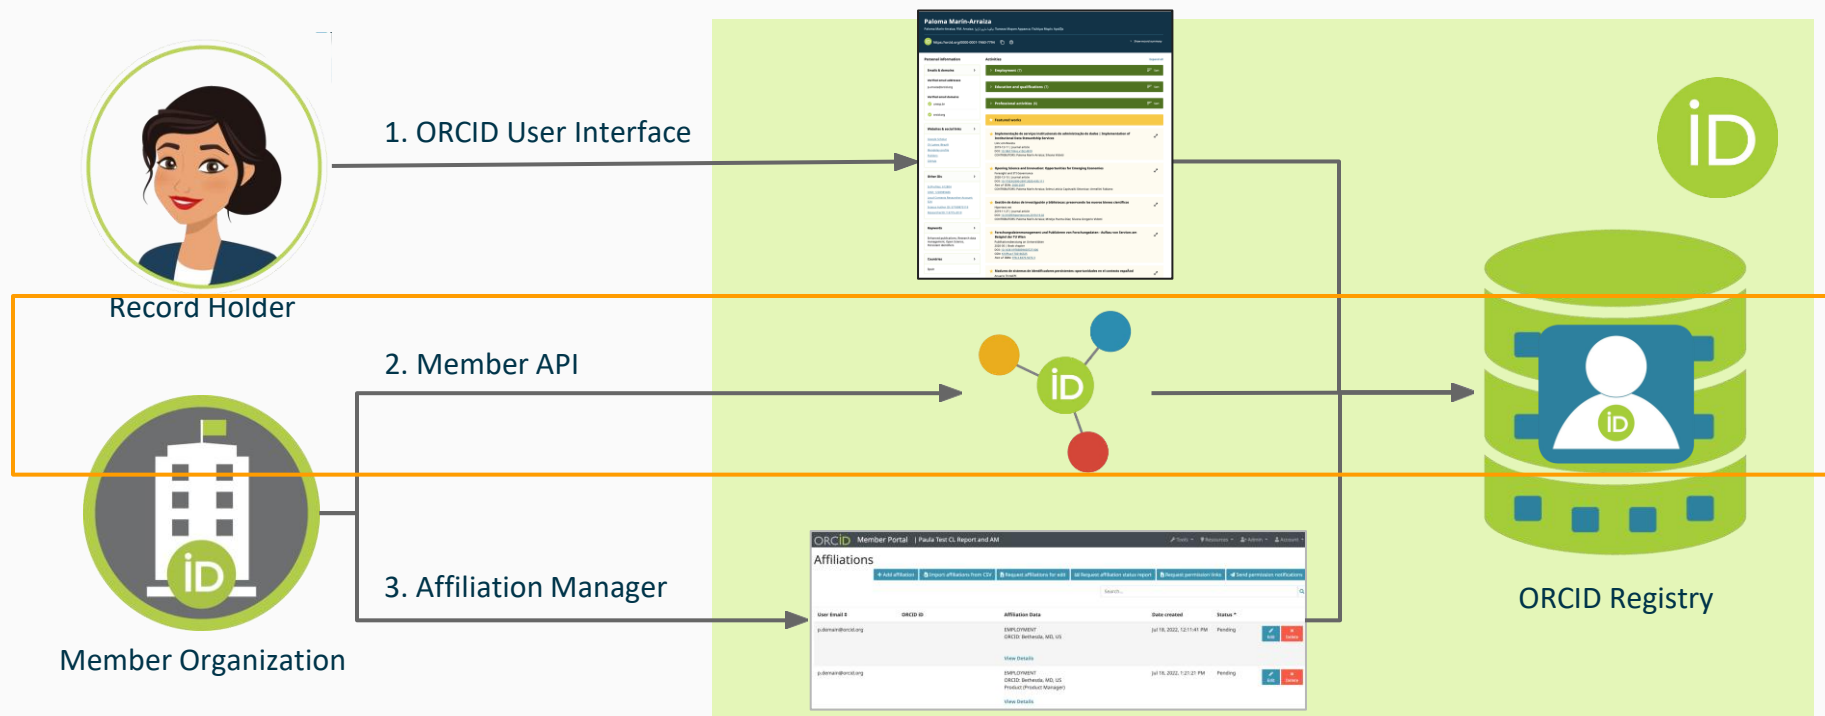

Think of ORCID as a hub of research-related data that gets propagated throughout scholarly systems

The more **fully-populated ORCID records** and integrated systems there are, the more value that all stakeholders can gain from adopting ORCID.

There are three ways for data to get into ORCID

For those curious about the Affiliation Manager <https://info.orcid.org/event/im-a-member-now-what-affiliation-manager-2/>

“Researcher Connect”: Connecting users to member integrations

Notification to connect users to relevant systems

The **problem**

Researchers don't always know that there are systems out there that can populate their records for them, save them time and add validated information.

Communication campaigns are very time-consuming for institutions.

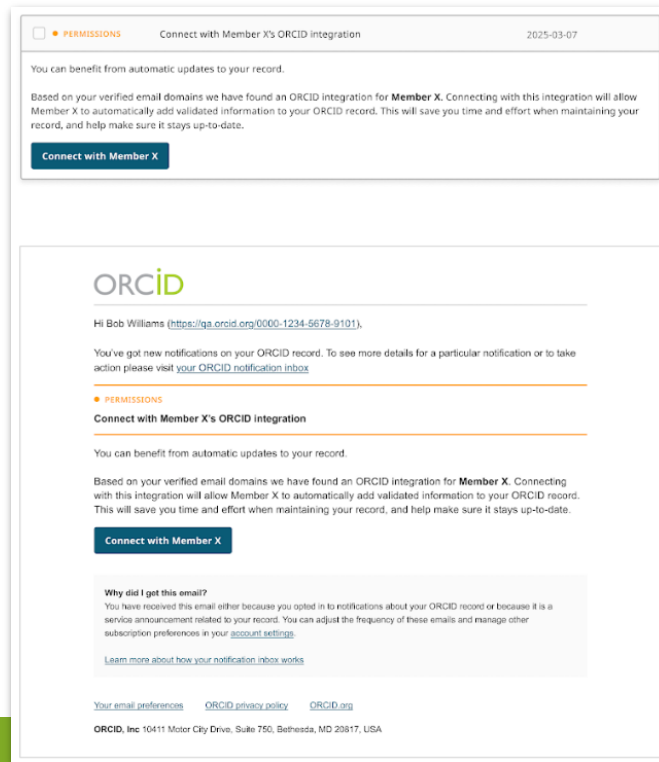

The **solution**

Prompt users to connect with relevant ORCID integrations, such as their institutional CRIS/RIM system, repository or general academic system.

Notifications are based on the email address stored in ORCID (regardless of whether it is public or not).

- User has an email domain for your organization (i.e. @tib.eu).
- User has not connected their ORCID to your integration.
- User has not received a notification OR received a notification 10 days ago for this feature for your specified client ID.

ORCID-focused website with information about ORCID at the institution and a call-to-action button

Organisation

ORCID

1. What is ORCID?
2. What are your advantages?
3. What are your rights?
4. What should you consider when starting with ORCID?
5. What does the ORCID membership mean for the University of Vienna as an institution?
6. Further Information

You are only two steps away from your ORCID record:

- Step 1: Log in to u:cris. [↗](#)
- Step 2: Link your u:cris profile with ORCID. [Instructions](#)

Register today!

- Improvements in the notification text
- Considerations around e-mail domain filtering
- Landing page UI suggestions

**Representation is key when
contributing data to ORCID
records**

We expanded the work types to reflect the diversity of scientific production and avoid the 'othering' effect.

13 neue Work Types:

Design	Conference proceedings
Image	Clinical study
Moving image	Learning object
Sound	Cartographic Material
Musical composition	Transcription
Blog post	Public Speech
Conference presentation	

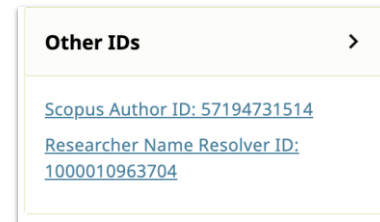

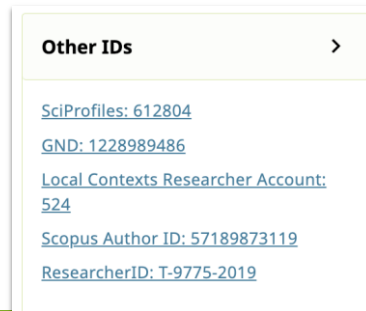

When thinking of ORCID as a hub of data, different people IDs must be considered too

It's "ORCID and...," not "ORCID or..."

ORCID works in combination with:

- **National Researcher Identifiers** (e.g. the Portuguese Ciência ID or the German/DACH GND)
- **Disciplinary Identifiers** (e.g. the ID within INSPIRE HEP)
- **Proprietary/Global Identifiers** (e.g. Clarivate's ResearcherID or Elsevier's Scopus Author ID)

Global participation implies language support

While non-English alphabets are supported, constant adjustments are required

Alphabets are correctly recognised
