REF (UK)

Research Assessment Framework

REF 2021
Staff details - REF1a/b
Research Outputs - REF2
Research Output Reviews
Impact - REF3
Case Studies
Environment data - REF4a/b/c
Environment - REF5a
Environments - REF5b

The Research Assessment Framework is the assessment exercise in the UK. All institutions should make a submission to Research England.

It's not just about publications. In Converis you can not only select the publications you're submitting with the help of internal peer reviews but also manage your impact and environment statements, needed per Unit of Assessment (research area).

Converis will generate eye catching reports to help your institution manage the entire process.

There is a REF Standalone module to allow non-CRIS users to use the system only to manage their REF submission.

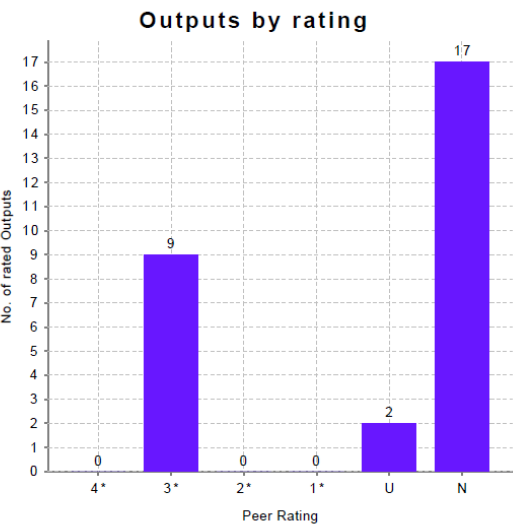

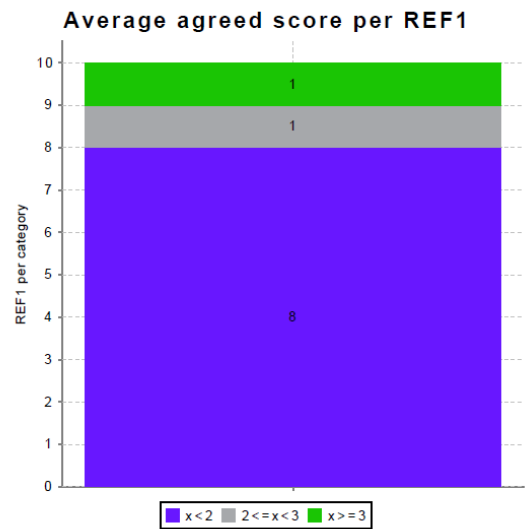

REF (UK)

Research Assessment Framework

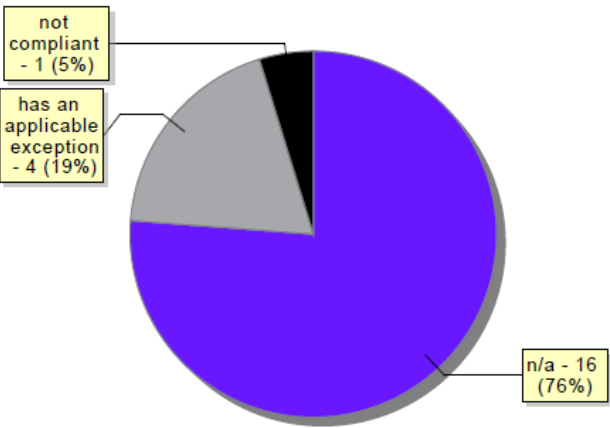

Submission profile for A 1 - Clinical Medicine

Total FTE for this Unit: 5
Total number of outputs for this Unit: 28
Outputs per FTE (target is 2.5): 5.60

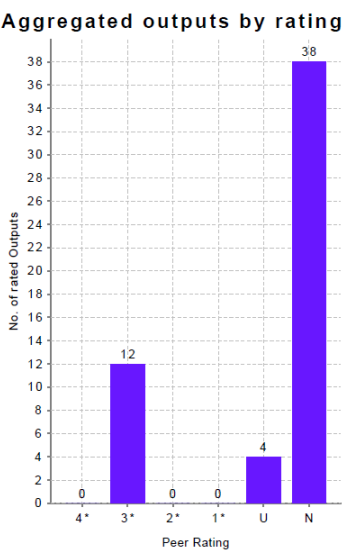

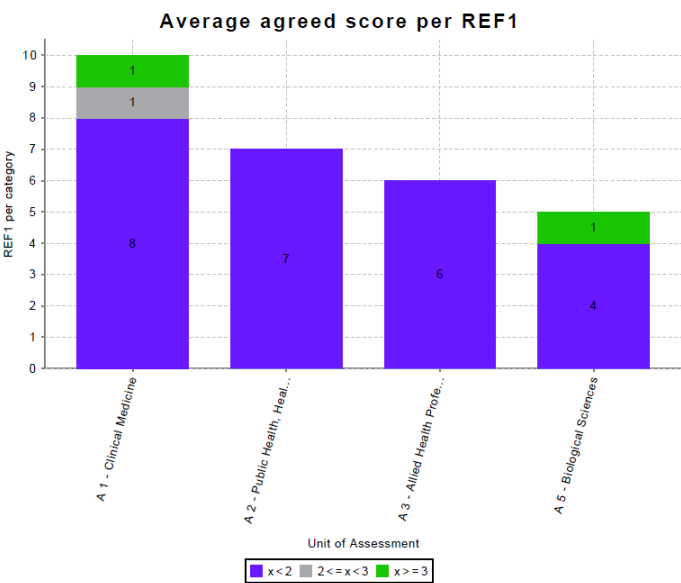

Has Impact: No
Required Case Studies according to FTE: 2
Total number of Case Studies: 0
Has Environment: No

Open Access

Aggregated Results

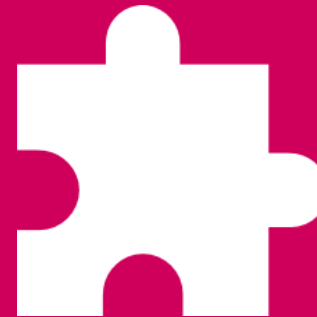

REF (UK)

Existing Converis users want to use their CRIS to manage their REF submission. Although Converis is configurable, it is our responsibility to provide users with a standardized data model and approach for REF that they can then adapt to their needs.

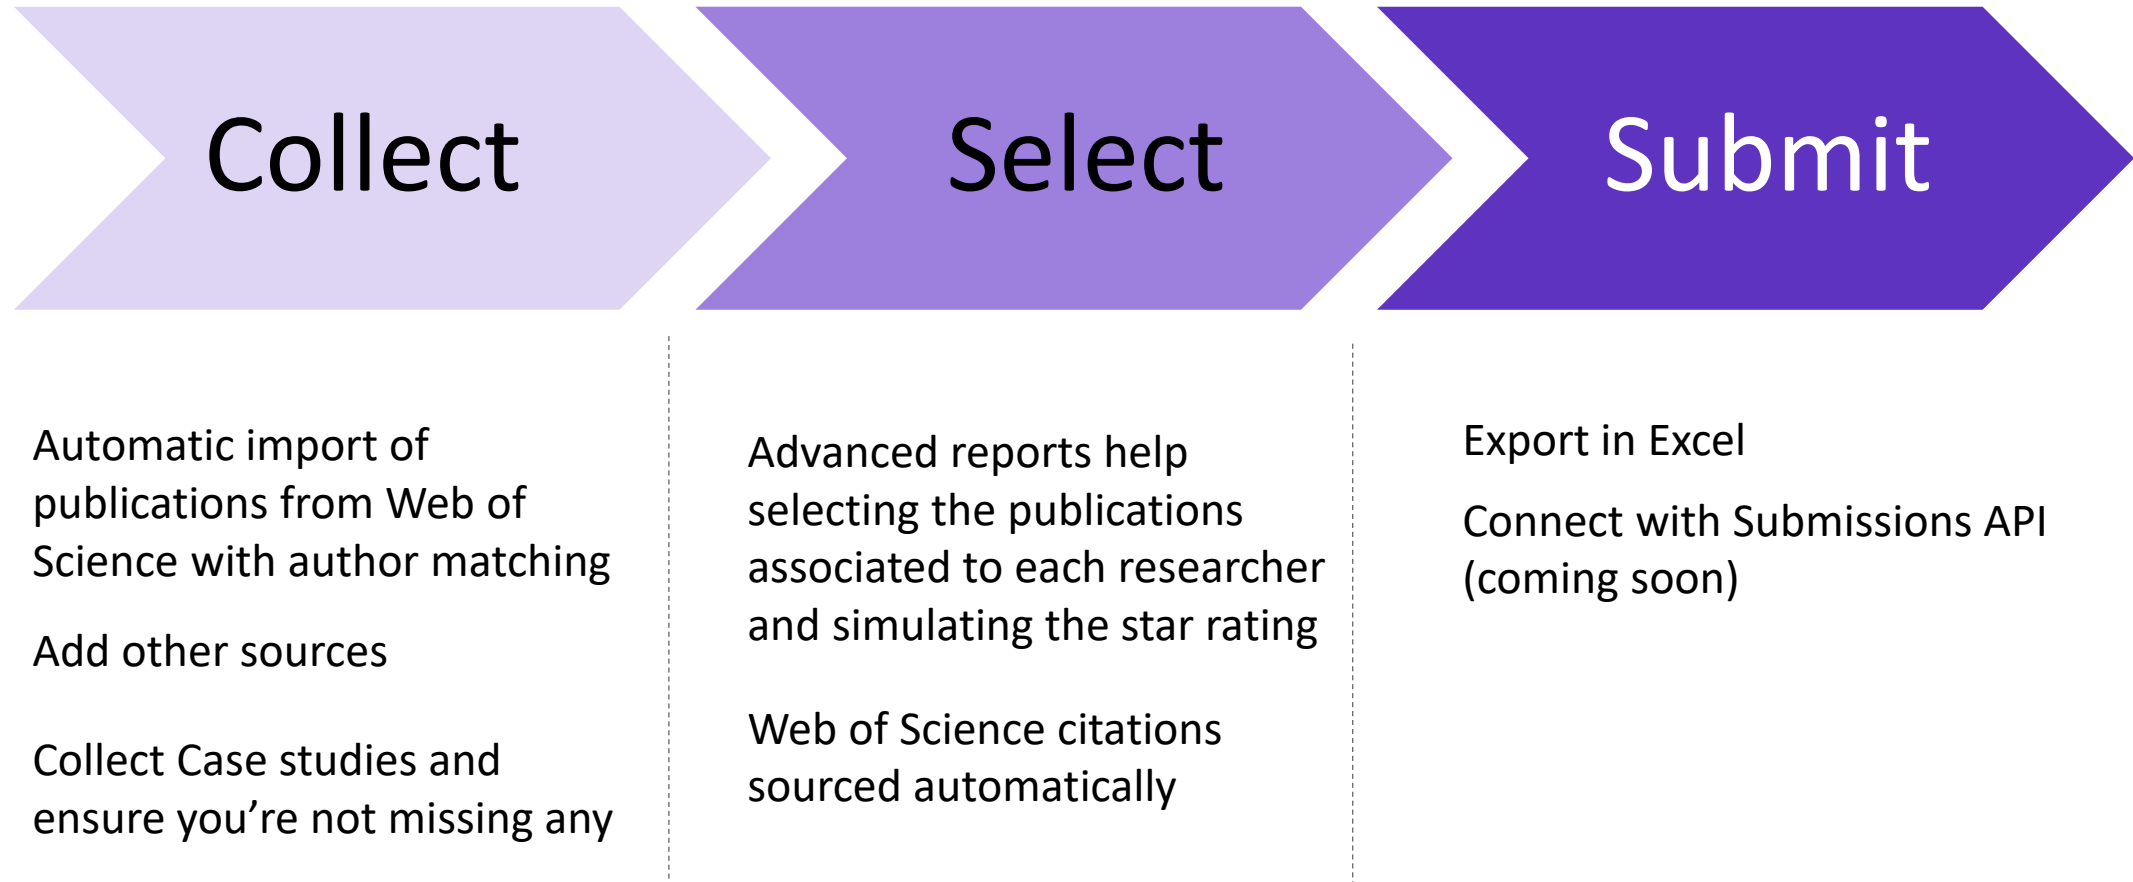

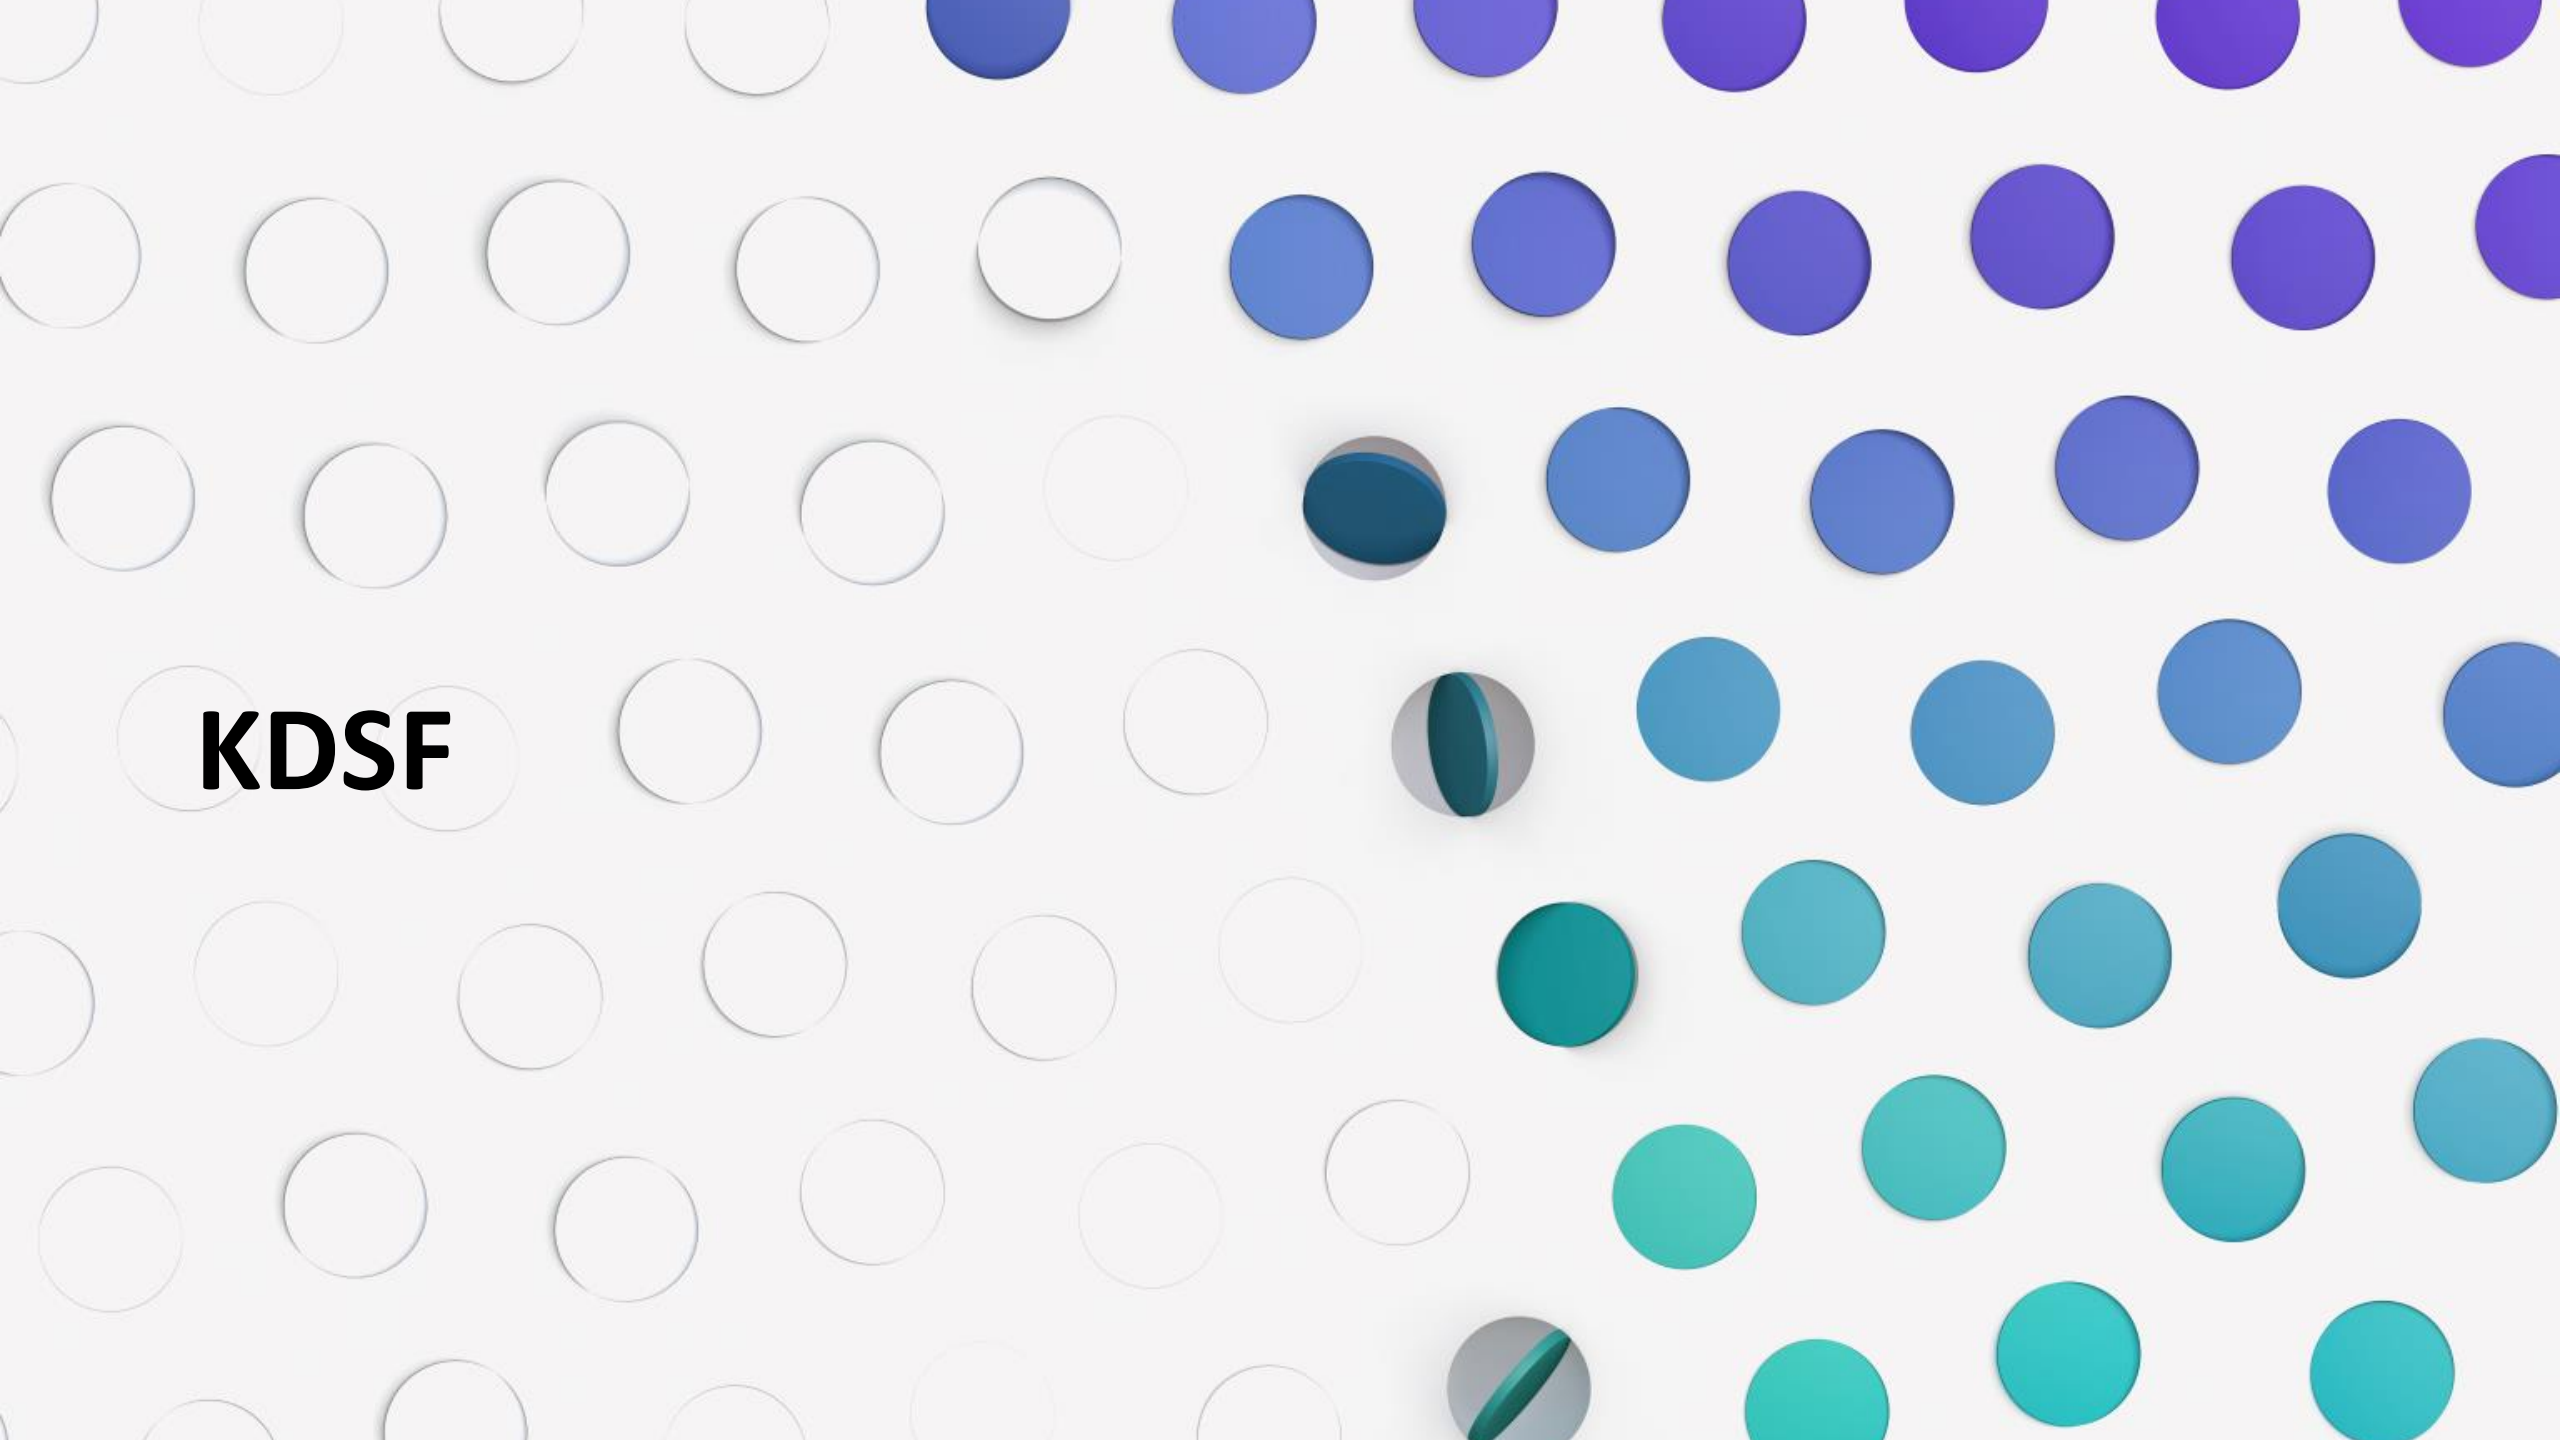

Institutions that do not have a CRIS or those that have one that doesn't satisfy them regarding its REF related capabilities, can use a stand-alone Converis REF.

REF (UK)

Research Assessment Framework

The background features a repeating pattern of circles. On the left side, there are several rows of white circles with thin grey outlines. On the right side, there are rows of solid-colored circles in a gradient: dark blue at the top, transitioning through medium blue and teal to a bright cyan at the bottom. The text 'KDSF' is positioned on the left, centered vertically between the white and colored circle sections.

VIVO

VIVO – The perfect match

A standard connection between the Converis standard data model and the VIVO standard ontology can be quickly set up.

Provide professional services for VIVO installation and customization.

Advise on integrations and data gathering from multiple sources as well as data transformation and reporting capabilities

VIVO and Converis share a philosophy: your data, your model.

Converis presents a unique opportunity to have a CRIS system that can be extensively extended to match your own needs for data and reporting. VIVO, being open source and providing the ability of changing or adding to the ontologies in use, is a perfect match for this integration.

Clarivate's mission is to provide a standard integration between the standard baselines of the 2 products and additionally help our customers to take full advantage of its extensible options.

Certified VIVO Partners

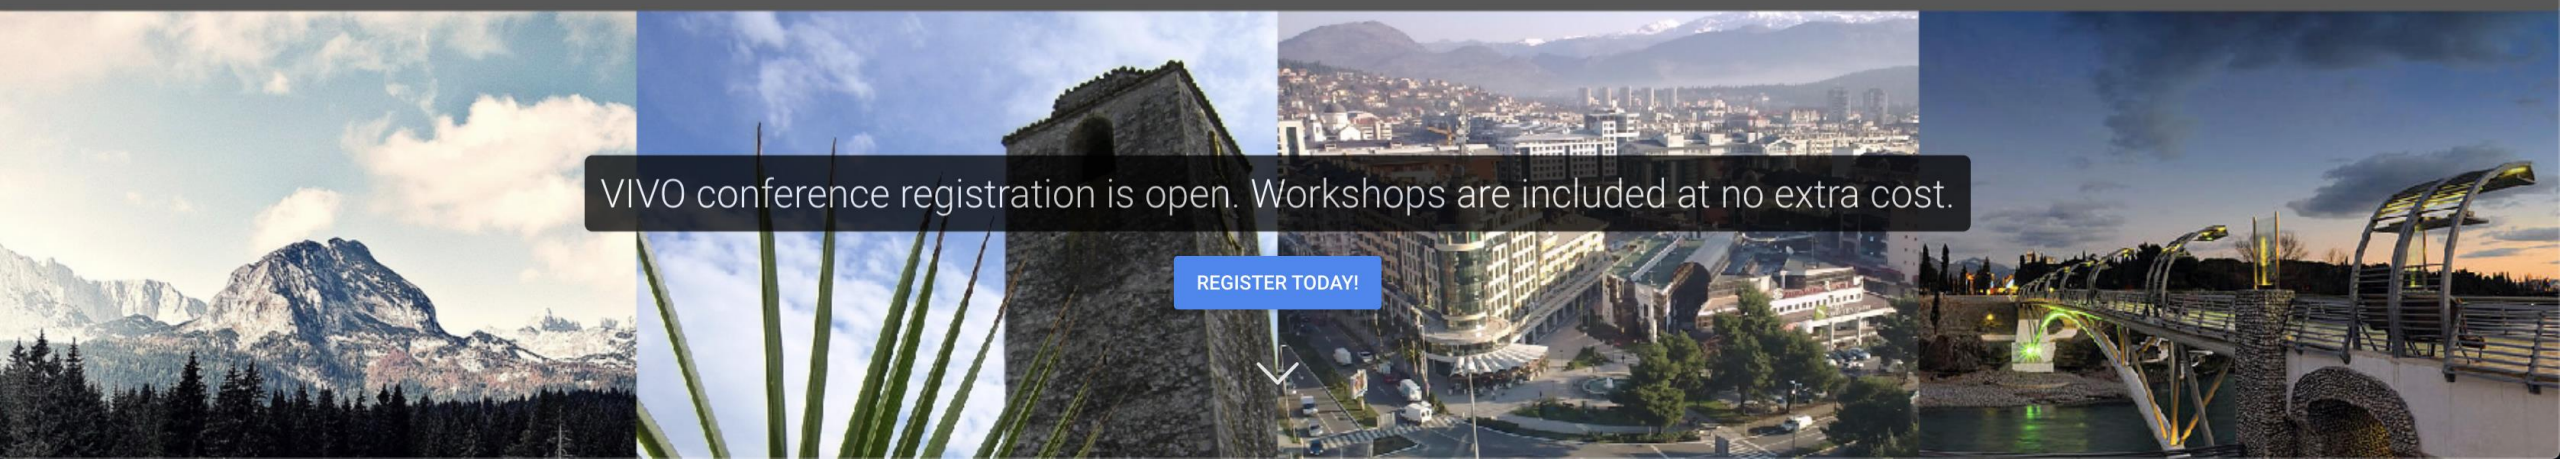

Certified VIVO Partners

These are organizations that have demonstrated expertise and a significant community effort to support DuraSpace open technologies through community leadership, in-kind contributions, and financial support. Partners contribute a minimum of 250 hours of in-kind community contribution annually as well as a percentage of gross annual revenue.

Description	Contact
 Clarivate Analytics offers services to help institutions install, implement, customize, and brand their VIVO site. As the provider of the Web of Science citation index, Clarivate Analytics works closely with the Web of Science data and APIs to help subscribers integrate their publication and citation data fully into VIVO. This can include citation counts, as well as additional indicators from InCites, our bibliometric analysis tool. We also work with institutional data and third-party data for full-scale VIVO implementations. We can extend the VIVO ontology, add visualizations, and brand a VIVO site based on your requirements. Services Include: Training, Customization, Consultancy, Integration, Installation/configuration	Name: Ann Beynon Email: Research.Networking@clarivate.com Phone: Website: http://info.clarivate.com/vivo-services-and-clarivate-analytics Locations: United States Language Support: English
