Vytautas Magnus University (VDU) CRIS

DSpace - CRIS

VDU CRIS essential advantages

- Open system architecture: better opportunities for integration with other University and 3rd party information systems
- Standards and guidelines: better data compatibility with other similar systems
- Live metadata import: more efficient cataloging process
- Integration with ORCID: more efficient options for synchronizing the researcher's information in ORCID according to his CRIS profile
- University website URL in CRIS entity URL path: more effective dissemination and more accurate assessment in external rating systems
- System configuration wide capabilities: better adaptability to local needs with little or no programming
- Open source: flexible adaptation to local needs

VDU CRIS local developments

- University website URL in CRIS entity URL path
- jQuery DataTables plugin integration
- Logos & files in the tables
- PDF viewer integration in both cases: bitstreams or via external REST API on demand
- Multiple contributor affiliations
- CRIS reports enhancements: Saxon XSLT processor, XML reports (ex. OJS3 native export for journal issue) using XSL stylesheets, additional virtual fields
- Integrated standards on demand provided by Lithuanian Standards Board
- Live import from eLABa (Lithuanian Academic Electronic Library)
- Other developments

University website URL in VDU CRIS entity URL path

- <https://www.vdu.lt> - Vytautas Magnus University Web site
- <https://www.vdu.lt/cris> - Vytautas Magnus University CRIS
- <https://www.vdu.lt/cris/entities/person/vilius-kuciukas> - profile

jQuery DataTables plugin integration, multiple affiliations

Research Reports System (PDB): data flow

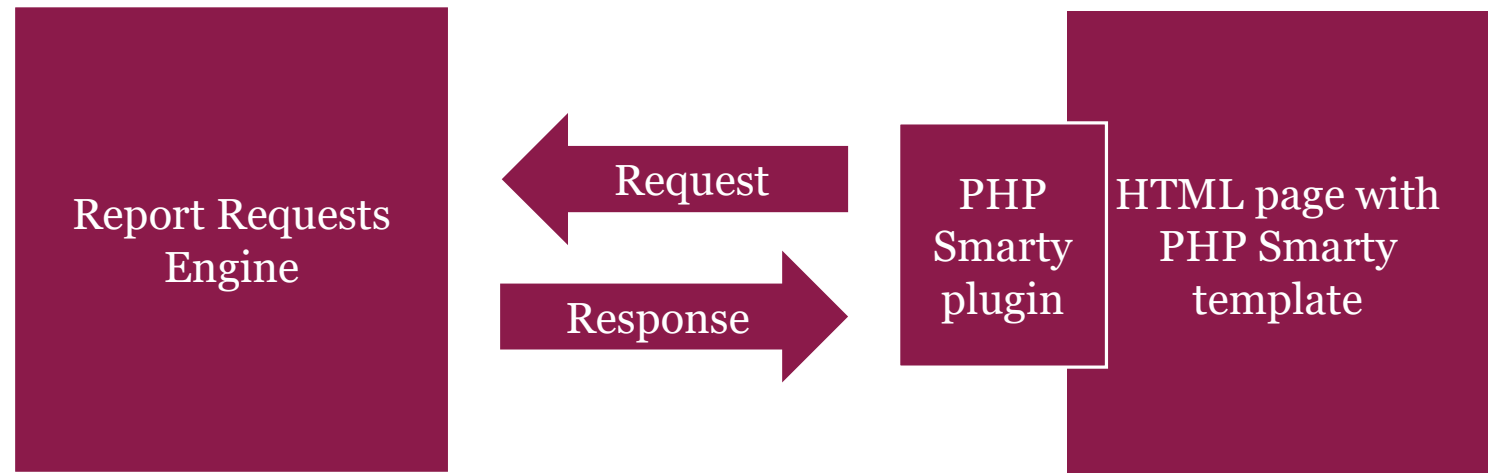

Research Reports System (PDB): publication data

- Author name, id, contribution
- Author affiliation department id, contribution, country, other info
- Publication classification (Lithuania specific)
- Research field classification (Lithuania specific), contribution
- Report classifications (report paragraphs)
- WOS & Scopus data
- Country, language
- Year, pages, sheets
- Belonging to approved lists of reference databases and publishers
- Etc.

Research Reports System (PDB): report generation process

- Request has filtering parameters
- Response contains list of found publication objects
- Response data object contains all data for report generation
- Output formats:
 - HTML
 - Word
 - PDF
 - CSV (Excel)
 - JSON (REST API)

Research Reports System (PDB): user interface
