

Cross-Country Collaboration:

The SELRIM Experience

The 4 Ws

WHO – Cineca (Italy), CSUC (Catalunya), EKT (Greece), FCT/FCCN (Portugal)

WHAT – The South European Link for Research Information Management (SELRIM)

WHEN – November 2015

WHY – To share views on the development of RIMS in their respective countries

SELRIM core values

CERIF

Open Source technologies

Adoption of Standards

Collaboration is the king

The plan

Identifying differences and commonalities

Setting common goals

What to share

What to get

When to meet

Identified common priorities for 2016

1st Quarter: Harvesting and sync info using OAI-PMH

2nd Quarter: CASRAI full academic CV express in CERIF xml

3rd Quarter: Improving of data validation processes

What to Share and What to Get

FCT | FCCN (Portugal)

GIVE

PTCRISync: ORCID Synchronization Framework

TAKE

CERIF Model | CERIF Services | CERIF REST API | CERIF OAI
| DSpaceCRIS

CINECA (Italy)

GIVE

DSpace-CRIS | ORCID HUB | upgrades | roadmap

TAKE

ORCID Synchronization Framework | CERIF REST API | CERIF
OAI

CSUC (Catalonia)

GIVE

CERIF validator | DSpaceCRIS early adaptor

TAKE

DSpace-CRIS | CERIF OAI

EKT (Greece)

GIVE

CERIF Model | CERIF Services | CERIF XML | CERIF REST API |
CERIF OAI | upgrades

TAKE

Contribution

Did it work?

Well, not really...

- Country projects (priorities can change)
- Different paths and velocity
- Lack of resources
- Slowly lost momentum

Did it fail?

Well, not really...

- Shared know-how
- Found new approaches
- Validated work
- Some wheels were not reinvented

What did we learn?

- Identifying common goals was an interesting exercise
- Defining what was there to be shared and what was expected to gain was crucial
- Having a clear common path with a “project manager” would have helped
- We should have had a formal collaboration supported by the Leadership of the organization or at a country level

Hope this could help
