Title:	Challenges in Coding Information on Article Processing Charges (APCs) into Institutional Systems
Authors:	De Castro, Pablo 
Keywords:	gold open access;article processing charges (APCs);research information management;current research information systems;system interoperability
Issue Date:	12-May-2015
Publisher:	euroCRIS
Conference:	Membership Meeting 2015 – Spring (Paris) 

Abstract: An increasing number of research funders in different countries are choosing to support the Gold Open Access (OA) route (i.e. obtaining immediate access to research outputs through their publication in Open Access journals) via the allocation of Gold OA Funds to institutions. This has led institutional libraries and Research Offices to undertake a new role within their wide research support activi...

Summary

cOAlition S has developed a *Rights Retention Strategy* to give researchers supported by a [cOAlition S Organisation](#) the freedom to submit manuscripts for publication to their journal of choice, including subscription journals, whilst remaining fully compliant with Plan S.

cOAlition S Organisations will facilitate this by changing their grant conditions to require that a Creative Commons Attribution licence (CC BY^[1]) is applied to all Author Accepted Manuscripts (AAMs^[2]) or Versions of Record (VoR^[3]) reporting original research, supported in whole or in part by their funding.

Some cOAlition S Organisations will, as of the commencement of the grant, require their grantees to apply a CC BY license to *all* future AAMs which arise from their funding (*prior licence*). Other cOAlition

Rights Retention Strategy at Dutch Universities FAQ

Why should I always add the RRS statement to my submission?

If you receive funding from a cOAlition S funder, we recommend to always include the RRS statement at submission even if you are planning to publish under a transformative agreement or in an open access venue. By doing so, you make sure to have an option to fall back on in case your planned route to open access is no longer available. This can be the case if the coverage or conditions of transformative agreements change over time or if the licensing options offered by the journal are no longer Plan S compliant.

I have forgotten to add the RRS statement at submission, what should I do?

If you have not included the statement at submission you should contact the [Open Access support team](#) at your institution. They can advise you on whether there are still options available that will allow you to comply with your funder's requirements.

Which repository should I choose to deposit the Author Accepted Manuscripts (AAM)?

Stappen Rights Retention strategie

In Pure vind je de optie “Add Library Keywords”. Kies hier “The AAM includes a Rights Retention Statement”. Hierdoor ontvangt de bibliotheek een melding dat het manuscript direct beschikbaar gemaakt moet worden in de repository.

Panel Discussion / CRIS2024 Conference Vienna (TU Wien, May 16th, 2024)

CRIS Data: Potential and Challenges for Open Access Monitoring and Negotiations

Chair: Ursula Ulrych (AT2OA², University of Vienna & University of Veterinary Medicine, Vienna)

Scientific Committee / Panellists: Patrick Danowski (ISTA, AT2OA², Austria), Natalia Manola (OpenAIRE), Arjan Schalken (UKB, Dutch University Libraries Network), Joachim Schöpfel (University of Lille/France)

The screenshot shows the 'Austrian Open Access Monitor' web application. The browser address bar displays 'https://oamonitor.obvsg.at/insights'. The application has a blue header with the title 'Austrian Open Access Monitor'. A left sidebar contains navigation links: 'Home' (house icon), 'Insights' (magnifying glass icon), 'Publications' (document icon), 'COAT classification' (glasses icon), and 'Data upload' (cloud with up arrow icon). The main content area is titled 'Insights' and features a filter panel with the following options: 'Institution' set to 'All institutions', 'Publisher' set to 'All publishers', 'Year of publication' with a range slider from 2014 to 2024, 'Include unknown OA status' (disabled), 'Reduced OA colors' (enabled), and 'Percentage representation' (disabled). Below the filter panel, there are four tabs: 'OA pro Jahr' (selected), 'OA pro Verlag', 'Anteile Inst. pro Jahr', and 'OA pro Publikationsart'. The main data area is titled 'Open Access Anteile pro Jahr'.
