Organized annually since 2014 The Seminar of University Knowledge Bases, is a meeting point for scientists, librarians, university managers responsible for research and people creating scientific information systems. From the first edition, the seminar became an important forum for discussion of various topics related to CRIS ([Current Research Information Systems](#)) and their implementation at universities.

The conference was initiated by the [Institute of Computer Science of the Warsaw University of Technology](#) and the [Main Library of the Warsaw University of Technology](#). Since 2017, the conference has been co-organized by the [Sages](#) company, responsible for the implementation of the [Omega-PSIR](#) system at various Polish universities.

Initially the main aim of the conference was to exchange views and experiences of the creators of Omega with the teams implementing the system at universities, scientists and specialists in the field of science evaluation. From 2018 the formula of the meetings expanded and currently it covers management problems related to scientific research and a variety of issues related with the evaluation of scientific achievements.

The commitment of the organizers of the Seminar, as the universities to cooperate with [EuroCRIS](#) resulted in the fact that the conference took on an international dimension, and it is now [the largest in Central and Eastern Europe, devoted to various issues related to science management](#).

SCOPE

The scope of the conference covers (but is not limited to) various issues of research management:

- Organization of evaluation processes at universities
- The use of CRIS systems for the evaluation of scientists
- Research data issues

- Visibility of universities in world rankings
- Methods of evaluation of research, traditional, new proposals (alternative matrix)
- Experience from the 2017-2021 evaluation
- The impact of scientific research on the functioning of society and economy

As every year, our speakers are outstanding [experts from around the world and Poland](#).

Additionally, this time we also announce call for presentations, providing the possibility of submitting presentations proposals will be reviewed and the accepted presentations will be included to the Seminar programme.
