Contents

- 1 Introduction
- 2 Processing an "Archive"-form
- 3 Optimizing "Archive"-feature

PART 1 Introduction

Two publication forms and what is "Archiving" used for

Two forms for a publication

General

- Finnish Ministry of Education (MinEdu)
- Numerous individual forms
 - Types A-I
 - Several attribute "paths" for each type

Archive

- Self-archive form
- Primary archive form
- Published in customer's repository

Two forms for a publication (side-by-side)

Abstract:
I will present "Archiving"-feature of the SoleCRIS system in euroCRIS Vienna 2024.

PART 2 Processing an “Archive”-form

1. Sufficient “General”-form information
2. Creating an “Archive”-form
 - Priorization of work
 - Different handlers for self-archives and primary archives
3. Editing an “Archive”-form
 - Dependence on “General”-form information and outside information

1. Sufficient "General"-form information

🔗 Self-archiving

The University of Oulu requires that the publications of researchers are self-archived into the university's open access repository Jultika ([Responsible research](#)). If your article has been published open access under a Creative Commons (CC) license, the library can self-archive the published version of the article. In other cases attach the final draft/author's accepted manuscript version of the article as a PDF file. Maximum file size 100 MB

☐

I wish to self-archive my publication

SUMMARY

We want to save our customer's time by

- Clarifying their work prioritisation
- Diminishing the need to navigate away from the “Archive”-form

THANK YOU FOR YOUR ATTENTION!
